

# Build a Bee!

## Materials

- Printer
- Cereal Box
- Scissor
- Saran wrap/press and seal
- X-acto knife or blade (optional, helpful with wings)

## Instructions

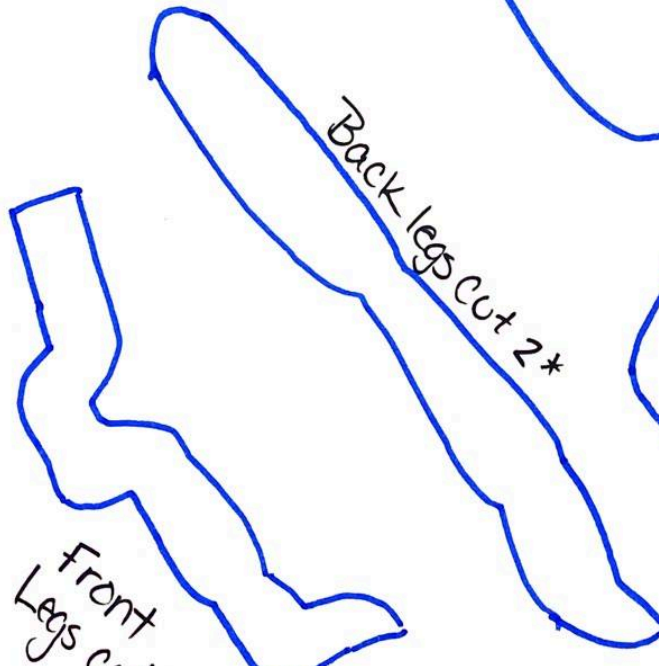

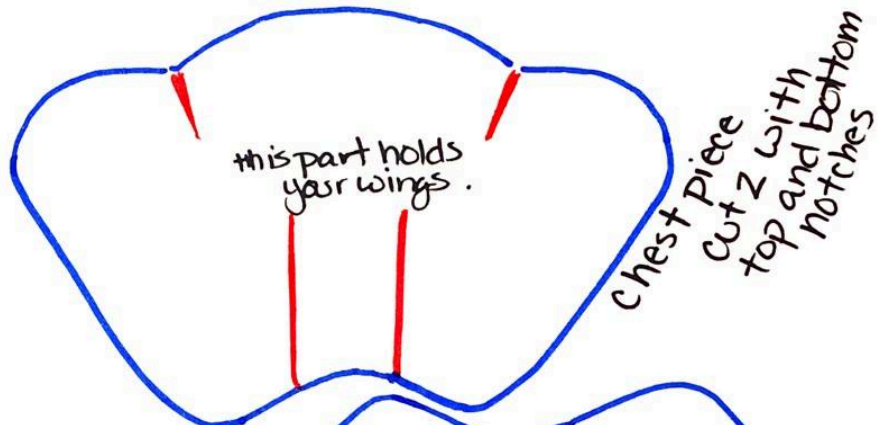

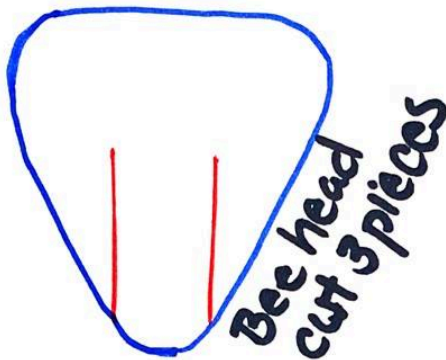

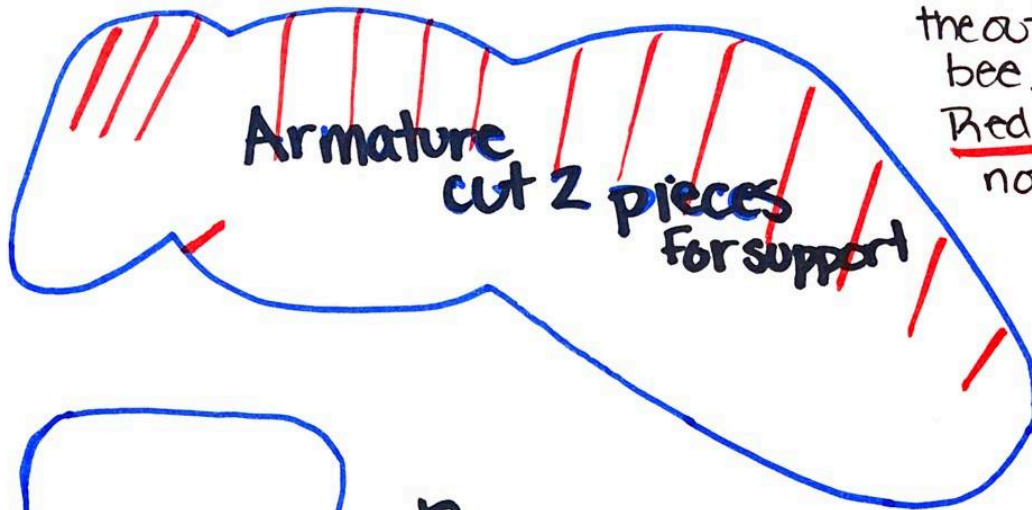

1. Print out the following diagrams
2. Cut out stencils along the blue lines
3. Trace stencils on the cereal box
  - a. Make sure to trace the number of times noted by each stencil (ex. You need to trace the head 3x)
4. Wrap wings in plastic wrap
5. Trace and cut notch placements on each piece according to the stencil
6. Assemble bee by placing each body part using the notches
7. Photograph and upload to Padlet
8. Revel in your amazing sculpture!

Blue lines are the outlines of your bee.

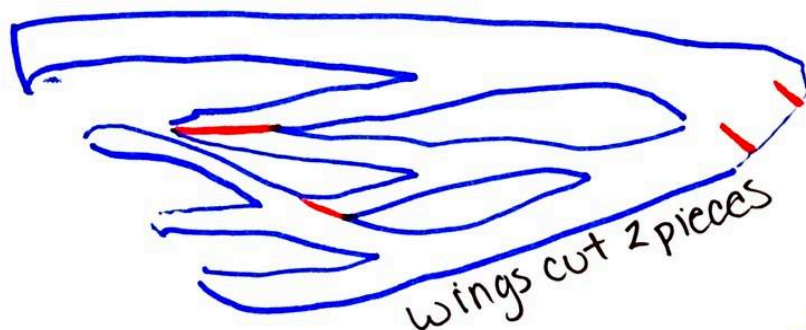

Red lines show notch placement/cuts.

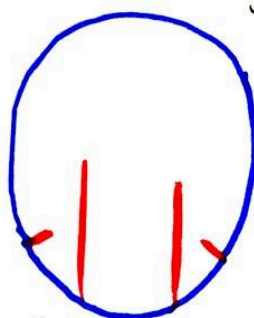

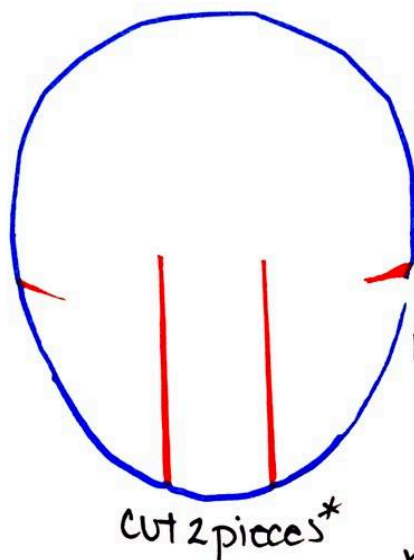

Chest piece  
cut 2 with bottom notches

\*Remember no notches on the legs as \* they are very thin.

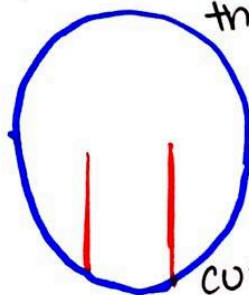

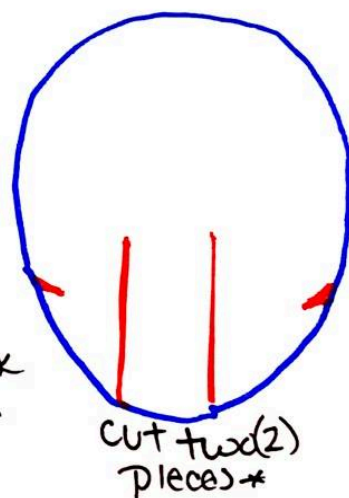

# Cereal Box Bee cont.

In my design I wrapped my bee wings in press n' seal wrap. Plastic wrap works for this step as well.

\* For the bottom pieces with side notches, only one of each of those pieces needs side notches. Those pieces will hold the back legs.
