Citizenship - Student Friendly Deep Learning Progression

Thinking like global citizens and considering global issues with empathy and compassion.

Dimension	Limited Evidence	Emerging	Developing	Accelerating	Proficient
A global perspective.	I really only care about my own life.	I'm starting to be interested in local and world issues. I try to understand different people's points of view.	I'm interested in world problems and challenges. I am starting to understand that events in one place affect other places. I know unfair things happen in the world and I want to help make a difference.	By myself and with others, I think about and work on issues that affect our world. I know that events in the world can affect my life. I believe everyone can help make the world better.	I am someone who thinks about and takes care of our world. I work hard to make positive changes in my community and beyond.
Commitment to human equity and well-being through empathy and compassion for different values and worldviews.	I see the world only from my own view and don't understand other cultures or beliefs.	With help, I am starting to understand my own and other cultures. I am learning to respect different values and points of view.	I'm starting to understand that who I am and how I see things are connected to where I was born and how I grew up. I am curious about different cultures and understand my own well.	I care about people even if I don't know them. I use my understanding of different cultures to see global issues from different points of view. I speak up for others	I use what I know about my own culture and other cultures to understand world problems better and find ways to help everyone. When I stand up for people who can't speak for themselves, I help

				who can't and try to make the world better.	make the world better. My confidence helps me take actions, big or small, to make life better for everyone.
Genuine interest in human and environmental sustainability.	I don't care much about the environment.	I know everyone's actions impact the environment. With help, I can think of ideas to help the earth and people. I am starting to see ways to make changes in my local environment.	I understand that caring for the environment is important for our survival as human beings. When I come up with solutions, I make sure I think about the environment and the problems it's facing.	I understand and appreciate the importance of the environment for human life and survival. I care about environmental issues and can create sustainable solutions.	I have a strong understanding of environmental issues and why they are important. My care for the environment helps me create lasting positive changes.
Solving challenges and real-world issues to help people.	I find it hard to think about real-world issues, challenges, or opportunities. I prefer tasks with easy solutions.	With help, I am starting to feel comfortable with real-world challenges that don't have easy solutions.	I am interested and comfortable with real-world challenges. With some help, I can work on tasks that don't have easy solutions.	I am skilled and interested in complicated real-world challenges that affect people in my community or the world. I can work on complicated issues that don't have easy solutions.	I use my skills to work on complicated issues that might have more than one solution. I can create new ways of looking at complicated issues.
Using technology for	I don't use technology to learn	I can use technology to connect to others and	I use technology to understand local,	I can describe how technology improves	I easily use technology to improve my

learning.	about issues.	learn about their lives. I am learning about digital citizenship and usually communicate respectfully online.	world, cultural, and environmental issues. I use technology to create and share ideas to make the world a better place. I follow laws and guidelines and am respectful and caring towards others online.	my understanding of world, environmental, and cultural issues. Technology helps me create and share fair and sustainable solutions. I am a good digital citizen.	understanding of world, environmental, and cultural issues. I use my knowledge and skill to solve new challenges. I can easily describe how I use technology to help me work on world issues. I encourage others to be good digital citizens.
