

Day 26/31 - \$0/\$74K Client Revenue

? Who You Are Now vs Who You Want to Be ?

- Now:
 - Brokie Job
 - Single
 - Debt up to my eyeballs
 - Skinny fat moving towards jacked
- Who You Want to Be:
 - Business Owner
 - Strong

🔥 Your Reason Why 🔥

I make shit happen. My why is because I fucking said so.

So I want to make \$10k per month + Rev share

Success metric:

☐ One 10k Retainer + Rev share

OR

☐ Two 5k Retainers + Rev share

OR

☐ Five 2k Retainers + Rev share

Current progress:

- ☒ ~~One 10% Rev share with first starter client~~
 - ☐ One 1k retainer client with Rev share
-

End day review: 06/11/24

Overall problems/mistakes throughout the day?

- WordPress was being gay and it it stalled my morning GWS

Solutions to each mistake/problem?

- Remind WordPress that being gay offends God.

G Work Checklist

- ☒ ~~Use subconscious mind to update new G program and delete desires for anything that doesn't make me a G.~~

Overall problems/mistakes throughout the day?

- Poured effort into the wrong development direction and spent money on the wrong tool, now need to wait for the money to return so that development can restart unless I get more.

Solutions to each mistake/problem?

- Include tool research into my workflow so that I don't waste time like this

G Work Checklist

- ☒ ~~Use subconscious mind to update new G program and delete desires for anything that doesn't make me a G.~~
-

Day - 06.11.2024

- ☒ ~~Wake up 07h40~~
- ☒ ~~Water 07h50~~
- ☒ ~~First GWS 07h55~~
- ☒ ~~Breakfast 09h35~~
- ☒ ~~Second GWS 09h55 - 10h30~~
- ☒ ~~Made lunch 10h30~~
- ☒ ~~Ate 11h00~~
- ☒ ~~Matrix job 11h20~~
- ☒ ~~Organized a made 15h30~~
- ☒ ~~Train 16h30~~
- ☒ ~~Watched PUC 18h00~~
- ☒ ~~Matrix Job 18h30~~
- ☒ ~~Third GWS 20h00~~
- ☒ ~~Sleep 23h10~~

GWS Reflections:

What tasks/objectives did I demolish?

- First outputs from my automation came out
- Found a way to streamline my automation

Problems/mistakes encountered?

- Output was WAY OFF
- Original assumptions were wrong
- Time was wasted trying to be too cheap

Solutions to each mistake/problem?

- Discovered the wrong tool was being used which was causing all the issues
- Returning to manual labor in the interim

☒ ~~GWS #1~~

- Picked where I left off yesterday and stress tested the foundation from yesterday
- Foundation is solid and can be built upon

☒ ~~GWS #2~~

- Began to produce and had to stop due to the GPT Limit
- Was unaware that the shitty output was actually meant to be the final output

☒ ~~GWS #3~~

- Found the root cause of the problem and noted that the funds I collected were directed to the wrong tool, now I have to wait for the refunded amount to return or get more, so that I can get back to work.
 - This took 3 hours of troubleshooting!
