

## Lab 3

### Exercise One:

Make a new file called *TurtleShapes.py* then write a code that draws this kind of star shape.

### Extras:

Make each line of this shape in a different color

---

### Exercise Two:

Make this shape as a turtle shape and draw it with turtle

---

### Exercise Three:

Make a new file called lab3.py then Change the turtle's shape into an image of your choice, just make sure that it is small enough - 50\*50 px / 35\*35 px - and also make sure that its .gif and not something else, Then continue to exercise four with in the same file.

**Online Converter:** <https://image.online-convert.com/convert-to-gif>

---

**Exercise Four:**

Try to draw something that looks similar to this using `turtle.forward()`, `turtle.right()`:

**Hint:**

**Use `turtle.home()`**

Then add a for loop that makes it look like this:
