

DEPARTMENT OF BOTANY
RERPORT OF THE BEST PRACTICE OF DEPARTMENT
2024-25

Name of the Activity: **Know our plants**

Participating students: B.Sc. Students.

Aim: Understanding the plants present in the surrounding area of the College Campus.

Method: First short list the plants present in the area. Prepare the details of the plants like floral, morphological etc. Select the proper place to display the plant of the week. Allot the responsibilities for taking care of the plants. Choose the plant to be displayed depending upon the flowering season. Take a twig or if possible entire plants (for herbs), bring the material to the laboratory. Clean it and put in the pot water it and display it for the students of B.Sc.I and II. Prepare the information of the plant on a big chart or card sheet paper in bold fonts so as to read from a distance. Paste the chart on the wall. Decorate it.

Outcome: The activity has played very important role for all the students. It is helpful to know the diversity of the plants of our region. The B.Sc.III students get the knowledge about how to conduct certain activities. Daily the students of B.Sc.I and II visit the activity. They write the information in their note books. This creates curiosity among the students. The information of number of plants is going on increasing. This activity has been conducted for the whole year. At the end of the year the students get information at least 40 to 50 plants.
