## TWO PHYSICISTS FOUND THE FUTURE!

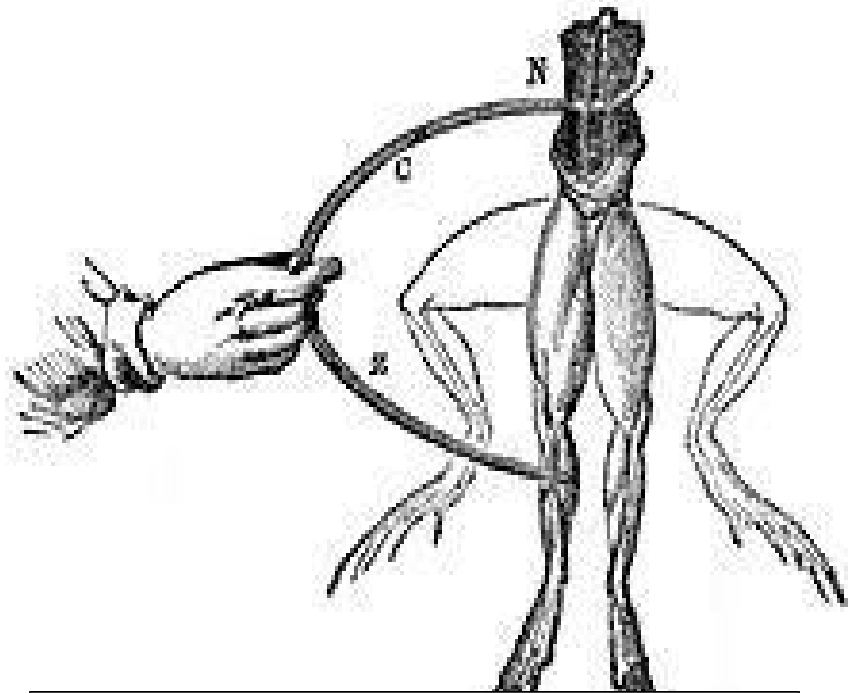

BEHOLD, FELLOW CITIZENS, WE HAVE THE POWER OF THE FUTURE!

A week ago, on the 19<sup>th</sup> of September, our great Italian physicist Lugi Galvani, has discovered a powerful source of energy when connecting 2 metals under the name of zinc and copper to a dead frog. Yes, you heard it, A DEAD FROG MAKES ENERGY that may well replace wood! Here is what our Physicist said about the discovery in more detail:

"The discovery that you could make energy out of a frog may well be used for anything, but we need to investigate the energy more..."

And so it did happen, our scientists began testing out the theory that you can make energy out of frogs, and it was Alessandro Volta that found it first, but he found something else, a even greater discovery! Here is what Volta said in his interview:

"My colleague's discovery has definitely opened up the world for us more than ever, but I may counter his theory that frogs-make-this-powerful-energy is wrong. I repeat, THIS THEORY IS WRONG, WRONG AND WRONG AGAIN!!!!!! There is no such thing as energy from a frog, a frog is dead, and what has happened is that Lugi has out the frog in an acid, and he had 2 different metals that caused this "powerful energy". The fact that Lugi missed the point that 2 same metals cannot do the powerful energy thing, which means that his theory is ABSOLUTELY WRONG, WRONG AND WRONG! AND THAT MY THEORY IS CORRECT, I AM THE GENIOUS. NOT HIM!"
