

[Georgia hunters, landowners have new deer management program](#) November 8, 2019
wgxa.tv

... The Deer Management Assistance Program, also known as D-MAP ... is to allow us to give flexibility to landowners, to better manage their deer herd on their property, and give management recommendations to help other landowners better manage the habitat on their property to improve the deer herd across the state ...

[Forest Management for Improving Deer Populations](#) July 21, 2020

... Are you looking to significantly improve your deer population? Forest, or [timber management](#), is one powerful way to do it. Forest management helps to create healthy and fertile deer habitats that will improve your wildlife for decades to come. Forest management is a seriously fertile investment opportunity for hunters and wildlife enthusiasts...

[Want deer? Protect your oaks](#) September 30, 2020 Georgia, Monroe County Reporter

... whitetails prefer white oak acorns above all others. ... the water oak is often underrated as a white-tailed deer food plant. Like the white oak, this tree usually doesn't produce its first crop of acorns until it is 20 years old. However, from then on, the water oak bears an abundant crop of acorns each year...they are high in fat and crude fiber and low in phosphorus and potassium...
