

Intro to Simmer

Links

- [Blank CODAP document](#)
- Tim's plugin site, codap.xyz
 - Here you will find some data and plugins
- [Awash in Data](#)
- [A CODAP document with simmer installed](#)
- [The Simmer guide](#)
- [US health data](#)

Plan

- Flexible! Depends on what you need...

However, in the absence of specific direction, I think this could help:

- Introductory remarks and questions about CODAP
- Demonstrate (you may shadow if you wish) some “simmer” basics.
- Two fundamental ways we imagine using simmer:
 - You use it to make something that produces data for students
 - Fake experiment
 - Testing the informal confidence interval
 - Students use it to learn about probability, data, and programming
- Show the simmer guide (link above) including some nascent problems that use the tool.
