## Communication

To chat in Minecraft type T which brings up a line you can type in.

For voice we use Discord. Install it on your computer or mobile device. Our Discord channel is VSTE VEPLN Chat server. We can send you an invite to the channel through Minecraft the day of the meeting. If you have a discord account and have it live, just click the link we post and you will be able to join us.

In the image below you see the channel icon (red arrow), the audio channel (blue arrow), the chat window (blue box *blurred*), and friends list (green box *blurred*). This is how it looks on my PC. It looks a little different on mobile devices.
