

# LINCS Data Publication License Agreement Supplementary Form

Version 1.3 | 2025 01 13

This form collects information to accompany the LINCS [Data Publication License Agreement](#) (DPLA). The DPLA is signed by a single Licensor. This Licensor may represent a collective set of data owners and/or the data contributor team.

Upon completion of this form, please return it to [lincs@uoguelph.ca](mailto:lincs@uoguelph.ca). The LINCS team will prepare a PDF copy for signing by LINCS representatives and the Licensor.

## Dataset

Dataset name	
--------------	--

## Licensor details

Full name	
Address	
Organization, department, and/or other affiliation	
Email address	

## Data ethics

The Licensors are reminded that new or additional ethics review at the Licensors' institution may be required for some datasets. Please review the latest version of the [Tri-Council Policy Statement: Ethical Conduct for Research Involving Humans](#), particularly the section on [Data Linkage](#).

- ☐ The data being published is related to research that required Tri-Council Ethics Policy review or internal ethics policy review at the data contributor's institution:
  - ☐ Yes, and the Licensors have provided proof of initial ethics approval, and determined that no further review is required.
  - ☐ Yes, and the Licensors have provided proof of ethics approval specifically for data linkage.
  - ☐ No ethics approval was required.

## Data licensing

- ☐ The Licensors agree to publish their data with LINCS under a CC-BY license.
- ☐ The Licensors do not agree to publish their data with LINCS under a CC-BY license. The Licensors have requested and received approval from LINCS to publish under an alternative license as follows:

- ☐ The Licensors are publishing data, or a data subset, that has been submitted to and approved by LINCS to be excluded from LINCS's requirements (stated in Principles 6 and 9 of the DPLA) for freely sharing and/or modifying where necessary. The restrictions on this data are as follows:

## Future uses of data

If LINCS is no longer able to host data, alternative arrangements requiring a less-restrictive license may need to be considered. In this event:

- ☐ The Licensor agrees to convert from a CC-BY license to a CC0 license or similar, if required in future, and does not wish to be consulted further.
- ☐ The Licensor does not agree to convert from a CC-BY license to a CC0 license or similar, if required in future, and wishes to have their dataset deaccessioned if it cannot be maintained with a CC-BY license.
- ☐ The Licensor requires consultation before converting from a CC-BY license to a CC0 license or similar, if required in future, using the contact information provided at the start of this agreement.

If the Licensor cannot be contacted despite LINCS's best efforts, the Licensor's wishes are:

- ☐ The data will be converted to a CC0 license or similar.
- ☐ The data will be deaccessioned.

## Additional uses of data

LINCS succeeds thanks to the generosity of its community. LINCS research outputs and training resources make use of the data LINCS publishes, unless the Licensor has placed restrictions on these uses.

The Licensor asks that LINCS **not** refer to the Dataset and any related research projects for:

- ☐ Research outputs, including publications and presentations by LINCS and its representatives
- ☐ Training and workshops by LINCS and its representatives
- ☐ LINCS-made tools and related documentation

This information has been agreed upon by the Data Licensor and the LINCS Collaboration:
