

A Celebration of family!

As a way to celebrate and appreciate our families each school will organise a special day.

With their families at home children will make family trees.

In school children will brainstorm ideas of what they love doing with their family (eg I love baking with my grandma, I love reading with my brother etc.) These ideas can be made into a mural.

To complement these activities children could learn a poem

The poem could be illustrated using pictograms. Children could also make a gift for their family such as a clay plaque or trinket pot.

Using writing frames children could also write a description of a member of their family.

Partners can select the activities that they prefer and upload them on the etwinning site.
