

LESSON REFLECTION

Purpose

In this quick writing activity, you'll revisit the lesson content and reflect on what you've learned. This will help you connect themes across lessons and think about the most important ideas you learned.

Process

1. In this lesson, you explored the economic developments and innovations in the Industrial Age. Write three or four sentences that answer the question: How did industrialization change economic systems, and what were the impacts of these changes?

2. Take a minute to talk with a partner about your response.
