

Jupiter's Chaotic Clouds

The new "Twisters" movie is a hit, but did you know there are even more chaotic storms in our universe? 🌀☁️

During its 61st close flyby of Jupiter on May 12, 2024, NASA's Juno spacecraft captured this color-enhanced view of Jupiter's northern hemisphere. Here we can see a detailed view of chaotic clouds and cyclonic storms in an area known to scientists as a folded filamentary region.
