# PMS

# Practice Management System

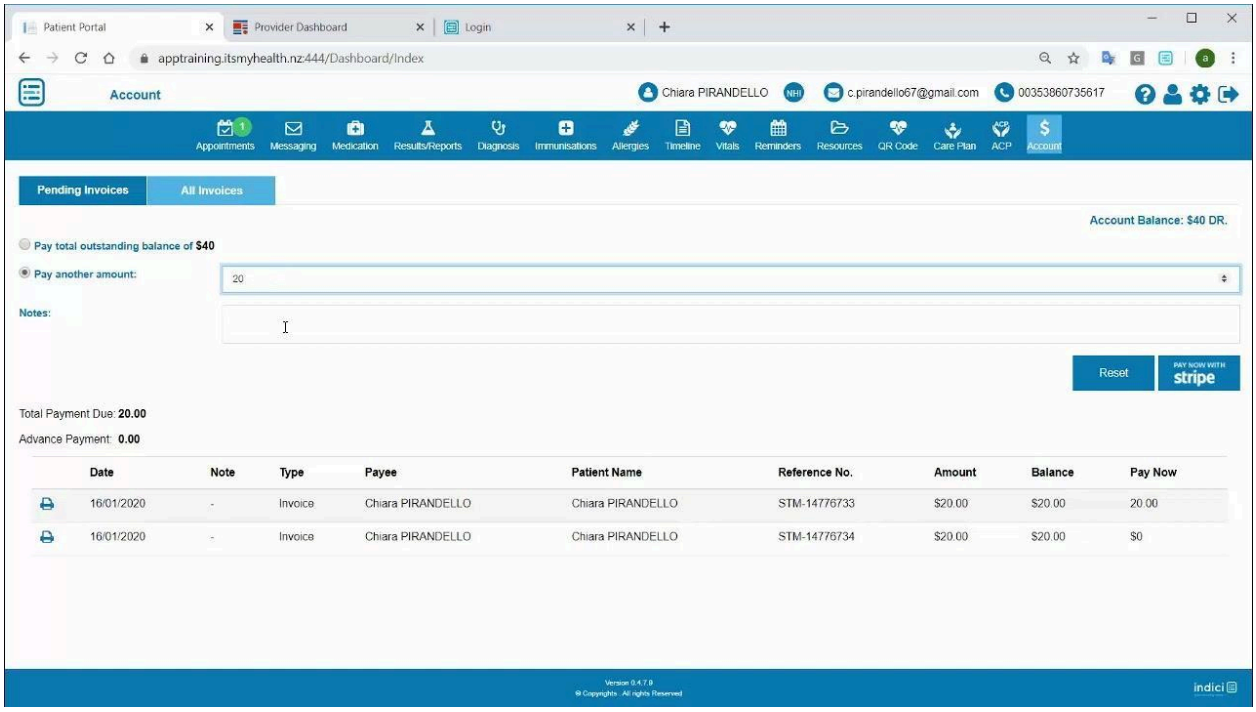

## Description

Design and development of a practice management system (PMS). It is a software solution designed to help healthcare providers, such as doctors, dentists, and other medical professionals, manage various aspects of their practice efficiently.

## My Role

I was working on the project as a Senior Software Engineer. Being a part of this project I have design and developed various modules of this software including Appointment Scheduling, Inbox, Electronic Health Records (HER) Integrations, Billing and Invoicing

Provider Search Screen

## Tools and Technologies Used

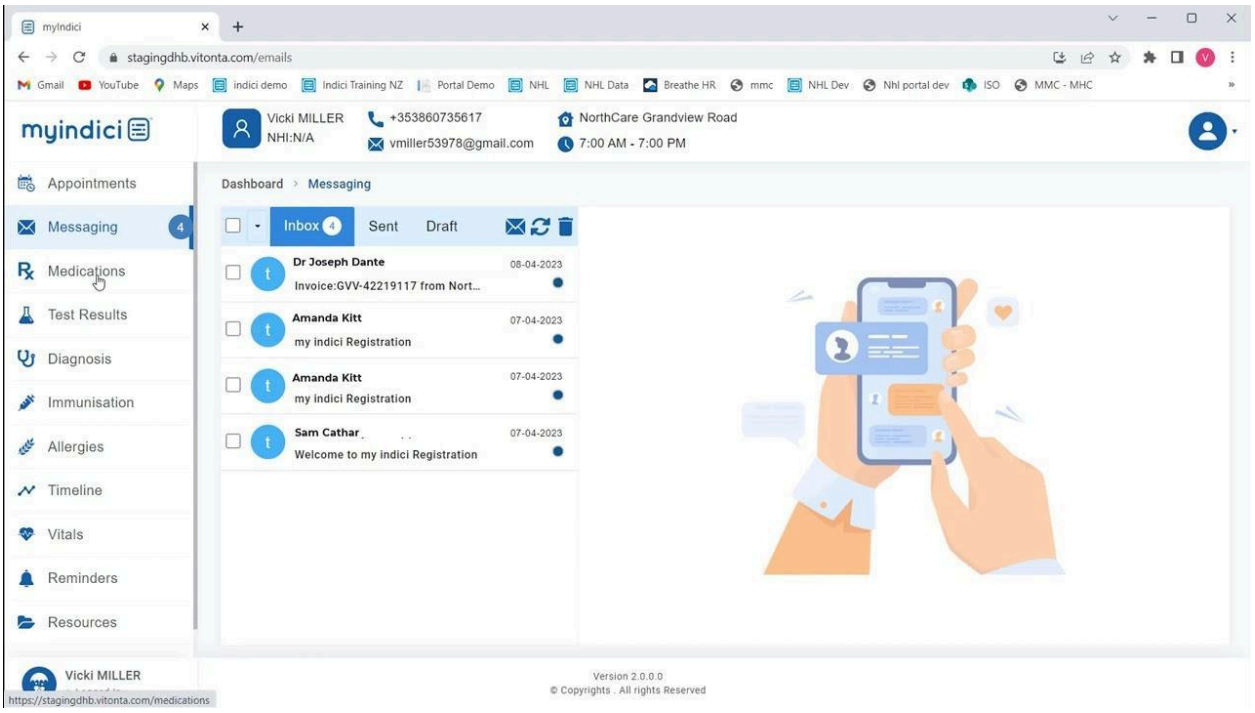

- ✔ .NET 4.7
- ✔ ASP.NET MVC
- ✔ C#
- ✔ JavaScript
- ✔ JQuery

- ✔ CSS
- ✔ Bootstrap 4
