

Dr. Rakesh Tirupathi is a Research Fellow in Prof. Aaron Thean's Research Group at the National University of Singapore'

Rakesh Tirupathi (Member, IEEE) holds a B.Tech. degree from Bapatla Engineering College, India in 2010, and an M.Tech. and Ph.D. degree from National Institute of Technology (NIT), Rourkela, India in 2012 and 2021, respectively. His research interests lie in in-memory computing circuit design, in-sensor computing circuit design, mixed-signal integrated circuit design, and sensor interfacing circuits. His expertise includes CMOS integrated circuits, capacitance and capacitive sensor measurement, switched capacitor networks, low-pass filters, operational amplifiers, application-specific integrated circuits, buffer circuits, calibration techniques, approximation theory, demodulation, field programmable gate arrays, low-power electronics, microfabrication, microsensors, modulation, square-wave generators, and signal conditioning circuits.
