August 14th Meetup

Demos

- Jane from Google demoing labs.google.com

- Nathan from Plotzy demoing AI for commercial real estate

Upcoming Events & Announcements

- DenAISummit.com/schedule ← sign up to apply for the AI Company Showcase and present your company to 100s of folks in AI

- Denver Startup Week is mid September. Deadline to submit a talk is this Friday

- Hey Jeremy, didn't realize you were taking notes. Will let you take it from here. You can delete my notes above as needed (this is Natty)

AI Builders Meet up Announcements

Den AI Summit

denaisummit.com

any stage company can give a talk

DEN Startup Week talks have to be submitted by Friday

Talks

Google Labs

Data science agent

Demo'd using a prompt to create a collab notebook to answer a data science problem

Also works on CodeGemma

Plotzy

AI for Commercial Real estate

Data is very distributed and hard to interpret (disparate pdfs across 1000s of different websites)

Using agentic AI to find resources by municipality

Using RAG to parse through dense municipality docs

Show Stop

Automates video production end to end (focused mainly on ads)
Currently Analysis, strategy and creative are split across different roles and teams
Focused on repurposing existing content from company's content library

Nvdia

Serverless inference on Nvidia DGX Cloud
Currently support most mistral and llama models
Need an enterprise nvidia account
Cost is time based not token based
The support comes via hugging face API w/ hugging face as the 'middle man'

CodeYam

Software simulation for PRs using AI
Can see impacted parts of the app with simulated data
