

Phil Lynch

- Governor since April 2020
- Background / Experience – I initially worked as an engineer but for most of my career. I have been an HR professional including working and Living in Russia for 5 years and in Saudi Arabia for 5 years.
- I have two secondary school age children.
- Why I became a governor –

A positive education stays with a person for all their life and it will also open doors and allow for them to fulfill themselves, but also receiving from them and giving them the best opportunities. A great primary education gives the foundations on which to build.

I have been lucky with varied and interesting work and to have parents who make sure my experiences at school were fun and successful. Being a governor helps more children have those chances.
