

In my previous post, I discussed the conditions for winning the \$25,000 prize in the Grid Solo ELM Holding event.

In this post, I will show you how to collect more ELM. There are two ways to get ELM:

1. Mining ELM in Puzzle mode: Simply playing the game in Puzzle mode gives you a chance to receive ELM. The amount you receive each time is random and unpredictable.
2. Receiving ELM from others: In Goc Partner, there is a feature that allows you to transfer ELM to others. You can get more ELM from others this way.

In the next post, I will discuss each method of collecting ELM in detail.

The Grid Solo ELM Holding Round 1 (2026) event is currently underway with a prize pool of up to \$25,000. Event details are in the comments.
