

Postcard Campaign: Repeal Bill 23, Save the Greenbelt

We're not giving up the fight to repeal Bill 23. Will you join us?

Use these postcards to ask your MPP which future they're choosing: one of food security, climate resiliency, and affordable housing? Or one of concrete, mansions, and a rampant housing crisis?

Step 1: [Print the postcards](#). Either print the postcards yourself or talk to your Local Exec about printing postcards in larger quantities.

Step 2: If you've selected the blank postcards for printing, write your message about why you believe Bill 23 should be repealed. This is also a great opportunity to meet up with folks in your area, write letters, and address postcards together!

Step 3: Address the postcards to your MPP. [You can find your MPP and their address here.](#)

Step 4: Send! Before you send, take a picture and tag us in it on Instagram! There's strength in numbers--let your action inspire others.

Dear MPP _____

Imagine this: almost a decade has passed since the Ontario Government repealed Bill 23 and expanded the Greenbelt.

And guess what? Through increased farmland protection, we are now producing more local and affordable food for Ontarians than ever before. We've taken significant steps towards mitigating climate change, offered greater protection to endangered species, including pollinators, and our natural heritage, waterways, and soils are among the richest and unspoiled in the world.

And there's more! The Ontario government has empowered local communities to create housing that meets the needs of all its citizens. Affordable housing is now based on what people can actually afford. Well over 1.5 million "missing middle" housing units have been built (with more on the way) and all within existing urban/municipal boundaries where it is most wanted and most cost effective.

This future is still possible. Repeal Bill 23 and expand the Greenbelt now!

Sincerely, _____

Dear MPP _____

Imagine this: almost a decade has passed since the Ontario Government passed Bill 23 and began to carve up the Greenbelt.

And guess what? We can't eat asphalt. We have lost the fertile land required to feed Ontarians to highways and urban sprawl. We have lost the opportunity to mitigate climate change; we've destroyed the habitat of 1,000s of newly extinct species, including pollinators; and our natural heritage, waterways and soils are polluted beyond repair.

And for what? The promise of affordable housing did not materialize; instead, McMansions and expensive gated communities litter the countryside where we once grew food. More people are precariously housed or homeless than ever before.

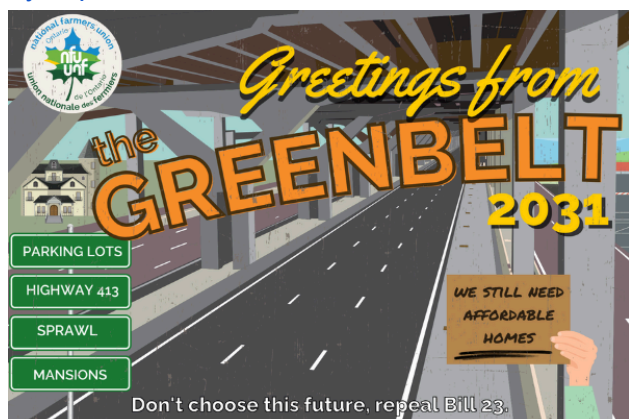

It's not too late to change course. Repeal Bill 23 and expand the Greenbelt now!

Sincerely, _____
