SCHOLARLY REVIEW AND ACADEMIC SERVICES PROGRAM

Program Brief:

Scholarly Review and Academic Services Program is a comprehensive academic exchange, consultancy, and professional service initiative of the University of the Philippines College of Pharmacy. It mobilizes the specialized expertise of its faculty members to (1) provide scientific, technical, and ethical review and consultancy services for pharmacy-related and other health research; (2) disseminate advanced knowledge and research findings through professorial lectures; and (3) facilitate the systematic transfer of technologies, processes, and other innovations to authorized receiving entities.

Areas: The Scholarly Review and Academic Services Program covers the following areas:

1. Scientific/Technical/Ethical Review

This extension service offers specialized technical review and consultation of scientific proposals and outputs, in terms of scientific and ethical soundness. The services are conducted by the different faculty members, who are experts in their respective fields of pharmacy research, upon invitation by the different institutional ethical review boards. Furthermore, independent clients conducting their respective research enlist the services of the faculty members who are well-known in the field.

2. Professorial Lectures

This extension program presents a platform for our accomplished faculty members to share their expertise and research findings. These lectures delve into a wide range of subjects, providing insightful perspectives on current academic and industry trends in pharmacy practice and industry

Program Expected Outcomes:

Specifically, the program aims to:

1. Provide expert scientific, technical, and ethical review services to ensure the quality, rigor, and integrity of pharmacy-related and other health-allied research
2. Facilitate the dissemination and exchange of advanced knowledge, research outputs, and best practices through specialized lectures, presentations, and scholarly engagements
3. Conduct technical, regulatory, and operational gap analyses between sending and receiving units
4. Ensure proper documentation and accountability throughout the review, knowledge exchange, and technology transfer processes
5. Strengthen academic collaboration, innovation, and capacity-building in pharmacy research, practice, and industry
