

Scenario 1

Darrell & Justin

You are the instructor in the classroom. One of the students, Darrell keeps making comments as you talk. Whenever you call upon Darrell to stop, he does stop though...for 5-10 minutes. Then it slowly starts to resume again. Quietly at first, until it goes back to its original volume.

What are things that you can do to 1) immediately resolve this 2) solve this for the long run? In your group, discuss and write down your solutions.

What are potential repercussions if Darrell is left unchecked or unmanaged? Play “devil’s advocate”, and consider ways that he can counter your solutions. With your group write down possible “what ifs” and what you could do to resolve it.
