

## **Announcement: Seeking Math Coaches for Paid Summer Residency!**

We are looking for math teachers to help us design a new product! BirdBrain Technologies is collaborating with the CREATE Lab at Carnegie Mellon University to develop a new educational technology focused on elementary math. This kit consists of interactive math manipulatives to study topics such as arithmetic and place value. Our goal is to provide fun, hands-on, learning experiences that meet Common Core math standards.

This summer, teachers will collaborate with the CREATE Lab and BirdBrain Technologies on the design of hardware and apps for this new technology. They will also create learning materials to integrate this new technology with elementary math curricula. Teachers will participate for two weeks, June 17-21 and July 29-August 2. Participation will require 30-40 hours each week for a total of 60-80 hours.

To be eligible to participate you must:

- Teach math at the K-5 level.
- Be able to participate at CMU for the entire residency period.

Preference will be given to individuals who have expertise with multiple grades and/or serve as math coaches for their school or district!

Participants will receive a stipend of \$150/day. (Total payment up to \$1500.) You will be responsible for transportation and parking costs.

Please share this with teachers in your network. If interested, please email [lcz@andrew.cmu.edu](mailto:lcz@andrew.cmu.edu) to find out more.

Thank you,  
Lauren Zito, Carnegie Mellon University CREATE Lab
