1. Introduction

Raale ("the App") is published for Apple devices. This Privacy Policy explains what information arises from your use of the App **as implemented in the current version**, how it is handled, and your choices.

2. Information We Collect

Raale **does not operate a proprietary server** to collect, store, or profile your identity or usage.

On-device data that the App may retain locally:

- **Raale credits:** A numerical balance used for **Luster Collector** exports (Seal archive saves), stored locally on your device via system preferences.
- **Luster Voice:** When you record, each session saves one **.m4a** audio file and a corresponding orb cover image (**.png**) into the App's sandboxed documents directory. Multiple recordings accumulate as a local history; each entry is identified by a timestamp-based ID. Audio files and cover images are stored using relative paths to remain valid across app reinstalls.
- **Luster Collector:** One image at a time may be loaded from **Camera** or **Photo Library** for vitrine preview and light-grade overlays, processed entirely on-device. Tapping **Seal archive** writes the composited image to your **Photos** library and deducts **5 Raale credits**.

Raale **does not** send your voice recordings, cover images, snapshots, or credit balance to developer-controlled servers — that functionality is **not implemented**.

3. How We Use Your Information

The App uses the above information **only** to:

- Operate **Luster Voice** (record, store, and play back your voice clips locally; display coined cover thumbnails in the session history).
- Operate **Luster Collector** (preview your specimen on-device; optionally write a Seal archive composite to Photos when you choose and credits permit).
- Maintain and deduct **Raale credits** for the credit-gated Seal archive action.
- Show in-app legal pages in a **WebView** when you open **Privacy Policy** or **Terms of Use** (see Section 5 regarding those requests).

4. Data Storage

All user content and credit data described in Section 2 stay on your device (App sandbox and, when you save, your Photos library). **There is no cloud upload to us** and no developer-operated database for your voice or images in the App as shipped.

Voice clip files and cover images are stored as relative paths in local preferences and resolved at runtime, ensuring they remain accessible even if the iOS sandbox container path changes.

5. Third-Party Sharing

We **do not sell** your information. We **do not** share your voice recordings, photos, or credit balance with advertisers or data brokers.

Apple: In-app purchases are processed by **Apple** under Apple's terms; we do not receive your full payment card details. Your device also connects to **Apple** for purchase validation and system services as part of using the App Store.

Legal document WebView: When you open Privacy Policy or Terms of Use inside the App, the App loads the **configured URLs** in an embedded browser. Those requests go to the hosts of those URLs (e.g., Google's document hosting when using Google Docs links). That behavior is only for **displaying** those documents.

6. In-App Purchases

Raale offers **consumable** virtual currency ("Raale credits") via Apple In-App Purchase using product identifiers **FROZ00** through **FROZ17** (18 tiers, including Big Deal promotional tiers). Purchases add credits to your **local** balance. **Restored** purchase events for consumables do **not** grant additional credits in the App's implemented logic. Payment, receipts, and refunds are handled under **Apple's** rules and systems.

7. Face Data

Collection: The App does **not** collect, process, or store **face data** as a separate category (e.g., no face templates, embeddings, or identity matching).

Technology: There is **no facial recognition** and **no face detection** API use in the App for analysis. The camera is used for **ordinary still snapshots**; the photo library is used to **pick** images for preview. **No face analysis** is performed by the App.

Sharing & retention: Face data is **not** shared with third parties by the App because it is **not** extracted or stored as face-specific data. Photo data you save remains under your control (on device / in Photos). For App Store review:

Question	Answer
What face data does the app collect?	None
Purpose of face data collection?	N/A — we do not collect face data
Is face data shared with third parties?	No
Where is face data stored?	N/A
How long is face data retained?	N/A — not collected
Specific section in this policy?	Face Data (this section)

8. Children's Privacy

The App is **not directed to children under 13**. We do not knowingly collect personal information from children. If you believe a child has provided information in a way that concerns you, contact us at the email below.

9. Security

We rely on **Apple's iOS** sandboxing and your device security (passcode, biometrics, etc.). No method of storage is perfect; protect your device and Apple ID.

10. Your Rights

Depending on where you live, you may have rights to access, correct, or delete personal data. **Most Raale-related data is local on your device** — you can delete the App, remove exports from Photos, and clear data via system settings as applicable. For questions, email us.

11. Changes to This Policy

We may update this Privacy Policy. The **Last updated** date at the top will change when we do. Continued use of the App after updates means you accept the revised policy where permitted by law.
