

**Deciphering hallmarks of resistance in a neoadjuvant breast cancer clinical trial**

Author: Amrita Basu

**Nonlinear post-selection inference for genome-wide association studies**

Author: Lotfi Slim

**Weight-based Neural Network Interpretability using Activation Tuning and Personalized Products**

Author: Hussein Mohsen

**Novel Insights into RNA Splicing from Interpretable Machine Learning**

Author: Mukund Sudarshan

**Do machine learning predictors of microbial phenotype from genotype identify causal variants?**

Author: Morteza m Saber

**Efficient inference of nonlinear feature attributions with Scrambling Neural Networks**

Author: Johannes S Linder

**Transfer Learning with Neural Motif Transformer for Predicting Protein-Protein Interactions Between SARS-CoV-2 and Humans**

Author: Jack Lanchantin

**Learning putatively causal gene regulatory programs using permutation-equivariant neural networks**

Author: Sanjit Singh Batra

**Visualizing High Dimensional and High Frequency Electrical Biosignals**

Author: Andres F Duque
