

Preliminary Education Specialist: Mild to Moderate Support Needs (MMSN) and Extensive Support Needs (ESN) Credential Evidence Guide

Standard 7: Effective Literacy Instruction for Students with Disabilities

The purpose of this document is to assist prospective Preliminary Education Specialist (MMSN and ESN) credential programs in responding to Program Standard 7: Effective Literacy Instruction for Students with Disabilities. In the following table, the standard is divided into sections to ensure that prospective programs address each aspect of the standard. (The fact that this guidance document separates the standard section should not prohibit the various concepts from being interwoven throughout the program coursework and clinical practice as is best practice in reading and literacy instruction and as described in Standard 1.) While a brief narrative is acceptable, please be judicious about the length of your response. Reviewers will be looking for the content of the standards reflected in your program. Additionally, unsubstantiated claims/narrative will not be sufficient.

In responding to the standard, please include the following:

- *Please list all required reading and literacy instruction related courses for the Preliminary Education Specialist Credential: Mild to Moderate Support Needs (MMSN) and/or Extensive Support Needs (ESN), by title and number.*
- *Please link the syllabi for the courses identified in #1.*
- *Please identify any other coursework in which reading and literacy instruction is covered but where it may not be the primary focus of the course.*
- *Please note that evidence for each element of the standard must be demonstrated in both coursework and clinical practice.*

Note: As part of the program review process, a TPE Matrix is required indicating where each TPE competency is introduced, practiced, and assessed within the program (see IPR instructions). In the case of this Program Standard 7, TPE 7 is the corresponding TPE. If the standard language is addressed by the evidence provided in the TPE matrix, prospective programs may indicate such here and link to the same evidence. This will not be the case for all phrases of the standard language so please review carefully. Responses may, but are not required, to be submitted on this form but must contain all the information requested and be organized similarly.

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
---	-------------------

<p>Program Standard 7: Effective Literacy Instruction for Students with Disabilities</p> <p>The credential program’s coursework and supervised field experiences encompass the study of effective means of teaching literacy across all disciplines^{1,2} based on California’s State Board of Education (SBE)-adopted English Language Arts (ELA) and Literacy Standards and English Language Development (ELD) Standards, and for Early Childhood Special Education programs, the Infant/Toddler Learning and Development Foundations and the Preschool Learning Foundations. Program coursework and supervised field experiences are aligned with the current, SBE-adopted English Language Arts/English Language Development Framework, including the crosscutting themes of Foundational Skills, Meaning Making, Language Development, Effective Expression, and Content Knowledge, as well as the Preschool Curriculum Framework. The program emphasizes the relationships among the five themes, including the importance of the foundational skills to student learning across all themes and how progress in the other themes also supports progress in the foundational skills. Through the integration of literacy coursework and supervised clinical practice, candidates learn that student instruction in each of the themes is essential and should occur concurrently (rather than sequentially), with emphasis based on grade-level standards. Candidates also learn that for multilingual and English learner students, concurrent instruction in each of the themes through integrated and designated ELD is critical.*</p> <p>*The text of this section of the standard continues below.</p>	<p>Describe how the program addresses each aspect of this section of the standard.</p> <p>The LVUSD MMSN Program is intentional about providing coursework and clinical practice that address effective literacy instruction for all students. Starting with EDF 703 Multilingual Education: Educating Diverse learners, candidates in the program will develop their foundational understanding of the CA ELA and ELD standards. Candidates will explore the major themes highlighted in the ELA/ELD framework as it relates to student learning. Also in that course, candidates will explore research based strategies to support multilingual learners related to listening, speaking, and reading.</p>
--	--

¹ Literacy comprises reading, writing, speaking, and listening; these processes are closely intertwined and should be understood to include oral, written, visual, and multimodal communication. The themes of the *ELA/ELD Framework* (Foundational Skills, Meaning Making, Language Development, Effective Expression, and Content Knowledge) crosscut the four strands of the ELA/literacy standards (Reading [Literature, Informational Text, Foundational Skills], Writing, Speaking and Listening, and Language) and the three parts of the ELD standards (Interacting in Meaningful Ways [Communicative Modes], Learning About How English Works [Language Processes], and Using Foundational Literacy Skills). In practice, these themes, strands, and parts are overlapping and should be integrated among themselves and across all disciplines.

² For students with disabilities the terms reading, writing, listening, and speaking should be broadly interpreted. For example, reading could include the use of braille, screen-reader technology, or other assistive devices, while writing could include the use of a scribe, computer, or speech-to-text technology. In a similar vein, speaking and listening could include American Sign Language, sign-supported speech, or other means of communication.

	<p>EDSMM 751 Reading Instruction and Pedagogy will focus primarily on the themes of the ELA/ELD Framework (Foundational Skills, Meaning Making, Language Development, Effective Expression, and Content Knowledge) and research based strategies for supporting learners with diverse needs.</p> <p>Additionally, ELA and ELD instruction is integrated throughout the courses as it relates to other aspects of supporting learners with mild/moderate support needs, specially related to assessment, progress monitoring, IEP development, and lesson planning. Candidates will build their competency in supporting students with identified with dyslexia and/or specific learning disability in the area of reading.</p> <p>Throughout the program, candidates will develop culturally responsive teaching practices as it relates to creating inclusive learning environments for all students. They will develop practices rooted in asset based pedagogies that recognizes, celebrates, and incorporates the diversity of students' cultures, backgrounds, and languages .</p>
--	---

	<p>Candidates will develop an understanding of EL academic progress at their site/district by exploring the CA Dashboard and reference the California Comprehensive Leadership Plan to create an improvement plan for their site/district.</p> <p>Candidates will implement literacy instruction during their clinical practice with consideration for UDL and other adaptations for multilingual learners. They will integrate SDAIE and ELD approaches in their teaching to support students' acquisition of English proficiency. Candidates will learn and utilize strategies to support engagement and learning.</p> <p>Please link to syllabi and any other appropriate evidence that supports the narrative.</p> <p>Matrix</p> <p>Please be explicit about how the program addresses the concepts or documents that are listed in this part of the standard such as Universal Design for Learning, MTSS, Dyslexia Standards, and the various other required foundational standards and frameworks.</p>
--	--

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>Grounded in Universal Design for Learning and asset-based pedagogies,³ the program supports the development of candidates’ knowledge, skills, and abilities expressed in the Teaching Performance Expectations to provide effective literacy instruction that is organized, comprehensive, systematic, evidence based, culturally and linguistically sustaining, and responsive to students’ age and prior literacy development. Candidates also learn to provide literacy instruction that is responsive to students’ linguistic, cognitive, and social strengths and collaboration with other service providers. Candidates learn the power of language (both oral—spoken/signed—and written) to understand and transform the world and to create socially just learning environments. The program builds candidates’ understanding that high-quality literacy instruction integrates all strands of the ELA/literacy standards, all parts of the ELD standards, and other disciplinary standards to develop students’ capacities as effective and critical readers, writers, listeners, and speakers.</p> <p>The study of high-quality literacy instruction in the program also incorporates the following elements of the California Comprehensive State Literacy Plan:</p> <ul style="list-style-type: none"> a. Principles of equity, diversity, and inclusion, including books and other instructional materials and practices that are asset-based and culturally and linguistically responsive, affirming, and sustaining^{4*} <p>*The text of this section of the standard continues below.</p>	<p>Evidence must be clear in both coursework and clinical practice.</p> <p>Please see page 2 for guidance.</p>

³ [Asset-based pedagogies](#) view the diversity that students bring to the classroom, including culture, language, disability, socio-economic status, immigration status, and sexuality as characteristics that add value and strength to classrooms and communities.

⁴ Culturally relevant pedagogy, culturally responsive teaching, culturally sustaining pedagogy, and funds of knowledge are all instructional approaches that affirm students’ cultural lives—both family and community—and incorporate this knowledge into the classroom and collectively deem students’ lived experiences as assets. These practices affirm the diversity that students bring to the classroom, including culture, language, disability, socio-economic status, immigration status, sexual orientation, and gender identity as characteristics that add value and strength to classrooms and communities. They include instructional approaches that leverage the cultural and linguistic experiences of students to make learning more relevant and effective.

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<ul style="list-style-type: none"> b. Multi-Tiered System of Support, including best first instruction; targeted, supplemental instruction for students whose literacy skills are not progressing as expected toward grade-level standards; and intensive intervention for individuals who have not benefited from supplemental support c. Instruction that is responsive to individual students' age, language and literacy development, and literacy goals; that engages families and communities as educational partners; and that is reflective of social and emotional learning and trauma-informed practices d. Incorporation of the California Dyslexia Guidelines e. Integrated and designated ELD f. Knowledge of how to promote multiliteracy in both English-medium and multilingual programs g. Assessment for various purposes, including formative, progress monitoring, and summative literacy assessment; screening to determine students' literacy profiles, including English learner typologies, and to identify potential difficulties in reading and writing, including risk for dyslexia; and diagnostic assessment in response to referrals for additional assessment and intensive intervention* <p>*The text of this section of the standard continues below.</p>	<p>Please see page 2 for guidance.</p>

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>Consistent with the <i>ELA/ELD Framework</i>, candidates learn instructional practices, through coursework and supervised field experiences, that are active, motivating, and engaging and to provide literacy instruction in collaboration with other educators. Candidates learn that effective practices begin with building on students’ cultural and linguistic assets, including home languages and dialects, backgrounds, experiences, and knowledge, including family and community, in all instruction. The program makes clear the importance of creating environments that promote students’ autonomy in learning, including providing choices in reading and other literacy-related activities. Candidates also learn that instructional practices vary according to students’ learning profiles and goals, age, English language proficiency, and assessed strengths and needs and include, as appropriate, direct instruction, collaborative learning, and inquiry-based learning. The program also addresses community-based instruction for students with disabilities, as well as the expanded core curriculum for students with visual impairments. Candidates learn the value of guided self-assessment and goal setting for student independence, motivation, and learning. Candidates also learn ways to collaborate and partner with families and communities ensuring that families are welcomed, informed, heard, and included in literacy development opportunities.</p>	<p>Please see page 2 for guidance.</p>

7a. Foundational Skills⁵

The Education Specialist credential program offers coursework and supervised field experiences that include evidence-based means of teaching the foundational skills to all students as a part of a comprehensive literacy program, with special emphasis in transitional kindergarten through grade three. Foundational skills include print concepts, including letters of the alphabet; phonological awareness, including phonemic awareness; phonics, spelling, and word recognition; decoding and encoding; morphological awareness; and text reading fluency, including accuracy, prosody (expression), and rate (an indicator of automaticity). Through the program, candidates learn that effective instruction in foundational reading skills is structured and organized as well as direct, systematic, and explicit. The program ensures that candidates understand that instruction in phonological awareness and phonics includes phonemic awareness; letter-sound, spelling-sound, and sound-symbol correspondences; spelling patterns; and practice in connected, decodable text. Candidates learn that instruction in foundational skills, particularly text reading fluency, also emphasizes spelling and syllable patterns, semantics, morphology, and syntax. As a result, candidates learn the connections among the foundational skills, language, and cognitive skills that support students as they learn to read and write increasingly complex disciplinary texts with comprehension and effective expression. The program also teaches that decoding requires mapping of spellings to their pronunciation, while encoding requires mapping of phonemes to their spellings, and emphasizes teaching both in ways that reflect their reciprocal relationship. Accordingly, the program teaches candidates to provide explicit instruction for young children in letter formation/printing in conjunction with applicable foundational skills and to help children apply their encoding skills in comprehensive writing instruction.*

***The text of this section of the standard continues below.**

Describe how the proposed program addresses each of the aspects of Foundational Skills as identified in this part of the standard (7a).

The LVUSD MMSN Program offers coursework that include research based practices related to teaching foundational skills to all students throughout our [foundational](#) and core courses ([751](#), [752](#), [754](#)). Candidates address lesson planning with [accommodations and adaptations](#) as part of their fieldwork and develop teaching strategies to support [literacy instruction](#).

Candidates will engage in [literacy instruction](#) during their student teaching experience and bridge theory to practice by [reflecting](#) with their mentor teacher on student proficiency in literacy development

Please make sure your response includes all aspects of 7(a).

Provide links to syllabi and any other available evidence that supports the narrative.

⁵ See also the [Resource Guide to Foundational Skills of the California Common Core State Standards for English Language Arts](#).

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
	Evidence must be clear in both coursework and clinical practice.

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>The program also includes evidence-based means of teaching foundational skills to multilingual and English learner students while they are simultaneously developing oral English language proficiency, and in some cases literacy skills in an additional language.⁶ The program teaches candidates to plan foundational skills instruction based on students' previous literacy experiences in their home languages and to differentiate instruction using guidance from the <i>ELA/ELD Framework</i>, including knowledge of cross-language transfer between the home languages and English.</p> <p>The program teaches candidates that effective instruction in foundational skills employs early intervention strategies informed by ongoing measures of student progress and diagnostic techniques and includes tiered supports in inclusive settings⁷ for students with reading, writing, or other literacy difficulties and disabilities, including students at risk for or with dyslexia. Candidates learn to monitor students' progress based on their knowledge of critical milestones of foundational skill development and to adjust and differentiate instruction for students whose skills are not progressing as expected toward grade-level standards. Candidates also learn how to collaborate with students' families and guardians as well as with teachers, specialists, school psychologists, other professionals, and administrators from the school or district to conduct comprehensive literacy assessments in coordination with assessment teams; develop Individualized Education Plans for eligible students, including students at risk for and with dyslexia; support classroom teachers as they plan and provide supplemental instruction; and provide accommodations through direct supplemental support and/or intensive intervention as appropriate. The program provides supervised, guided practice in clinical settings that allow candidates to provide initial, supplemental, or intensive intervention instruction in foundational skills, particularly at beginning levels of decoding.</p>	<p>Please see page 6 for guidance.</p> <p>EDSMM 751 will address evidence based pedagogy related to teaching foundational literacy skills to EL students and students with disabilities. There will be a focus on formal and informal assessments related to ELD proficiency and reading progress. Candidates will be versed in the California Dyslexia Guidelines .</p>

⁶ See updated [Bilingual Authorization Program Standards and new Bilingual Teaching Performance Expectations](#).

⁷ See the California Department of Education/WestEd 2021 publication, [California's Progress Toward Achieving ONE SYSTEM: Reforming Education to Serve All Students](#).

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>7b. Meaning Making</p> <p>Coursework and supervised field experiences emphasize meaning making as the central purpose for interacting with and interpreting texts, composing texts, engaging in research, participating in discussions, speaking with others, and listening to, viewing, and giving presentations. This includes the use of assistive technology and/or Augmentative and Alternative Communication (AAC) devices as appropriate for students with disabilities. The program addresses literal and inferential comprehension with all students at all grades and in all disciplines, including making connections with prior knowledge and experiences. The program also teaches the importance of attending to a range of higher-order cognitive skills at all grades appropriate to students' development, such as reasoning, inferencing, perspective taking, transfer/generalization, and critical reading, writing, listening, and speaking across disciplines. The program ensures that candidates understand that among the contributors to meaning making are language, including vocabulary and grammatical and discourse-level understandings; content knowledge; motivation and engagement; comprehension monitoring; and in the case of reading and writing, the ability to recognize and produce printed words and use the alphabetic code to express ideas automatically and efficiently with understanding.*</p> <p>*The text of this section of the standard continues below.</p>	<p>Describe how the program includes each aspect of Meaning Making as identified in this part of the standard.</p> <p>Meaning making will be integrated throughout the coursework and student teaching experience. Specifically in EDF 703 and EDSMM 751, candidates will address comprehension of text and higher level thinking skills. Candidates will demonstrate competency in designing instruction to address written expression and speaking and listening.</p> <p>Please make sure your response addresses all aspects of this part of the standard (7b).</p> <p>Provide links to syllabi and any other appropriate evidence that supports the narrative.</p> <p>Matrix</p> <p>Evidence must be clear in both coursework and clinical practice.</p>

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>The program highlights the importance of providing students opportunities to interact with a range of print and digital, high-quality literary and informational texts that are developmentally appropriate, fully inclusive, culturally and linguistically relevant, and affirming as listeners, readers, speakers, and writers and to share their understandings, insights, and responses in collaboration with others. Through coursework and supervised field experiences, candidates learn to engage students in reading, listening, speaking, writing, and viewing closely (i.e., with close and thoughtful attention) to draw evidence from texts, ask and answer questions, and support analysis, reflection, and research. Candidates also learn to promote deep and sustained reading of increasingly complex texts and to plan instruction, including intentional scaffolding and integration of students' assets, based on an analysis of the text complexity of instructional materials and the integration of meaning making with other themes.</p>	<p>Please see page 8 for guidance.</p>

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>7c. Language Development</p> <p>Coursework and supervised field experiences emphasize language development as the cornerstone of literacy, learning, and relationship building and as a social process and meaning making system. Candidates learn that it is with and through language that students learn, think, and express information, ideas, perspectives, and questions orally and in writing. The program presents ways to create environments and frame interactions that foster oral and written language development for all students, including discipline-specific academic language. Candidates learn to facilitate communication for students who use American Sign Language, eye gaze, vocalizations, AAC devices, alternative learning media (e.g., braille), or other communication strategies. The program focuses on instruction that values and leverages students’ existing linguistic repertoires, including home languages and dialects, and that accepts and encourages translanguaging. The program promotes multilingualism and addresses multiliteracy in both English-medium and multilingual programs.*</p> <p>*The text of this section of the standard continues below.</p>	<p>Describe how the proposed program includes each aspect of Language Development as identified in this part of the standard (7c).</p> <p>Candidates will learn strategies to support communication and language development as it relates to students who are multilingual learners and have communication delays. They will develop their understanding of the use of AAC and assistive technology.</p> <p>Please make sure your response addresses all aspects of this part of the standard (7c).</p> <p>Provide links to syllabi and any other appropriate evidence that supports the narrative.</p> <p>Matrix</p> <p>Evidence must be clear in both coursework and clinical practice.</p>

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>The program addresses the importance of developing students' language, including their knowledge of how language works and the impact of students' disabilities on their language development. Candidates learn to support students' oral and written language development, including vocabulary knowledge and use. The program highlights effective teaching of vocabulary both indirectly (through rich and varied language experiences, frequent independent reading, and word play/word consciousness) and directly (through the explicit teaching of general academic and discipline-specific terms and of independent word learning strategies, including morphology and etymology). The program also attends to grammatical and discourse-level understandings of language. Candidates learn that grammatical structures (e.g., syntax) and vocabulary interact to form text types or genres that vary according to purpose, intended audience, context, situation, and discipline. The program addresses ways to facilitate students' learning of complex sentence and text structures and emphasizes that students enrich their language as they read, write, speak, and listen; interact with one another; learn about language; create diverse oral, print, digital, and multimodal texts; and engage with rich content across disciplines. Candidates learn to plan instruction based on the analysis of instructional materials and tasks; the assessment (formal and informal) of students' speaking, writing, or other communications; understanding of students' English language proficiency; and the integration of language development with other themes.</p>	<p>Please see page 9 for guidance.</p>

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>7d. Effective Expression</p> <p>Coursework and supervised field experiences address effective oral and written expression, including how students learn to effectively express themselves as activity and discussion partners, presenters, and writers and to use digital media and visual displays to enhance their expression in a manner that is appropriate for their age and development. Candidates learn how to engage students in a range of interactions and collaborative conversations and to prioritize extended conversations with diverse partners on grade-level topics and texts and to facilitate communication for students who use American Sign Language, eye gaze, vocalizations, AAC devices, or other communication strategies. Candidates learn to help students identify effective expression in what they read, listen to, and view as they examine the words, images, and organizational structures of written, oral, or visual texts, including the nonverbal and social interactions depicted or implied in the texts. Through the program, candidates learn to teach students to discuss, orally present, and write in ways appropriate to their age and development so that their meanings are conveyed clearly, logically, powerfully, and, when appropriate and desired, poetically. Candidates also learn how to help students communicate in ways appropriate for their purpose, audience, context, and task and gain command over the conventions of written and spoken English (along with other languages in multilingual programs) as they create print and digital texts. The program focuses on candidate instruction and supervised support that values and leverages students' existing languages and dialects, including translanguaging, and that promotes effective expression in languages other than English in both English-medium and multilingual programs.*</p> <p>*The text of this section of the standard continues below.</p>	<p>Describe how the program includes each aspect of Effective Expression as identified in this part of the standard (7d).</p> <p>Effective expression will be addressed in EDSMM 751 as candidates design instruction that allow for various means of expression and representation. Specifically, they will integrate the visual and performing arts to teach students to act out and present content to demonstrate their learning. During their student teaching experience, they will integrate effective expression in their instruction.</p> <p>Please make sure your response addresses all aspects of this part of the standard (7d).</p> <p>Provide links to syllabi and any other appropriate evidence that supports the narrative.</p> <p>Matrix</p> <p>Evidence must be demonstrated in both coursework and clinical practice.</p>

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>Through coursework and supervised field experiences, candidates learn to engage students in writing for varied purposes and to prioritize daily writing, including informal writing, to support learning and reflection across disciplines. They also learn to teach students to plan, develop, provide feedback to peers, revise using peer and teacher feedback, edit, and produce their own writing and oral presentations in increasingly sophisticated genres, drawing on the modes of opinion/argumentation, information, and narration. Candidates learn the importance of supporting students to use keyboarding, assistive technology, and other learning media, as appropriate, and the value of developing spelling and handwriting fluency in the writing process. Candidates also learn to provide explicit instruction in letter formation/printing, including the use of assistive technology as needed, and related language conventions, such as capitalization, punctuation, and spelling, in conjunction with applicable decoding skills. In addition, candidates learn to engage students in self- and peer-assessment using a range of tools and to allocate sufficient time for creation, reflection, and revision. The program teaches candidates to plan instruction based on the analysis of instructional materials and tasks; the assessment (formal and informal) of students' speaking, writing, or other communications; and the integration of effective expression with other themes.</p>	<p>Please see page 11 for guidance.</p>

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>7e. Content Knowledge</p> <p>Coursework and supervised field experiences address content knowledge, which includes literary, cultural, and discipline-specific knowledge, as a powerful contributor to the comprehension of texts and sources of information and ideas. The program highlights the integration of literacy across disciplines and the reciprocal relationships among the development of academic language(s), literacy, and content knowledge. Additionally, the program promotes the collaboration of educators across disciplines to plan and implement instruction that maximizes students’ development of literacy skills and content knowledge. The program also teaches candidates to understand that while building content knowledge enhances literacy development, it also serves to motivate many students, particularly when the content relevance is clear, reflects and values students’ diverse experiences and cultures, and is responsive to their interests.*</p> <p>*The text of this section of the standard continues below.</p>	<p>Describe how the program includes each aspect of Content Knowledge as identified in this part of the standard (7e).</p> <p>Candidates will build their competency in supporting the development of academic language and content knowledge. Specifically, in EDF 703, EDSMM 751, and in the clinical experience, candidates will implement instruction that builds content knowledge as it relates to disciplinary literacy.</p> <p>Please make sure your response addresses all aspects of this part of the standard (7e).</p> <p>Provide links to syllabi and any other appropriate evidence that supports the narrative.</p> <p>Matrix</p> <p>Evidence must be clear in both coursework and clinical practice.</p>

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>The program emphasizes the importance of full access to content instruction—including through printed and digital texts and other learning media, discussions, experimentation, and hands-on explorations—for all students. The program teaches candidates to provide the supports needed based on students’ language proficiency levels or learning differences and addresses inclusive practices, including access to incidental learning experiences, and co-teaching models. The program helps candidates build students’ understandings of disciplinary literacy—the ways in which disciplines use language and literacy to engage with content and communicate as members of discourse communities (e.g., historians, scientists). The program addresses the role of content knowledge as students navigate increasingly complex literary and informational texts, research questions of interest, evaluate the credibility of sources, and share knowledge as writers and speakers in ways that are appropriate to students’ age and development. The program also teaches the importance of wide and independent reading in knowledge building and literacy development. In addition, the program provides multiple opportunities for candidates to learn how to promote digital literacy and the use of educational and assistive technology, including the ability to find, evaluate, use, share, analyze, create, and communicate digital resources safely and responsibly, and to foster digital citizenship.⁸ The program teaches candidates to plan instruction based on the analysis of instructional materials, tasks, and student progress as well as the integration of content knowledge with other themes.</p>	<p>Please see page 13 for guidance.</p>

⁸ See [California Digital Learning Integration and Standards Guidance](#) for additional information.

7f. Literacy Instruction for Students with Disabilities

Coursework and supervised field experiences provide candidates an understanding of how various disabilities can impact literacy instruction (e.g., dyslexia, dysgraphia, autism, speech/language impairment, varied cognitive abilities, executive function disorder, visual impairments and blindness, deaf and hard of hearing). The program addresses how candidates can appropriately adapt, differentiate, and accommodate instruction to provide access to the curriculum for all students. The program teaches candidates to understand that a student's membership in a particular disability category represents a label for a qualifying condition and that the range of severity of disability and the educational needs within each category vary widely. Candidates learn that services should be based on individual need and not a qualifying condition. The program ensures that candidates understand Multi-Tiered System of Support and the value of providing initial, supplemental, and intensive instruction in inclusive settings, including co-teaching and the use of instructional support personnel, including classroom assistants and specialists (e.g., support during center rotations, working with students on individual goals, facilitating whole group activities to allow candidates to work with students on individual goals). The program addresses the importance of data-based decision making to plan intensive intervention that is responsive to students' age and development, including (as appropriate) continued emphasis on early literacy skills to permit access to literacy and content across all disciplines.*

***The text of this section of the standard continues below.**

Describe how the program includes each aspect of Literacy Instruction for Children with Disabilities as described in this part of the standard (7f).

Candidates will demonstrate an understanding of how various disabilities can affect literacy instruction and development. EDF 703 will address typical literacy development and set the foundation for designing literacy instruction.. [EDSMM 751](#) will focus on supporting students identified with learning disabilities- addressing the continuum of intervention related to MTSS and the IEP progress.

Please make sure your response addresses all aspects of this part of the standard (7f).

Provide links to syllabi and any other appropriate evidence that supports the narrative.

[Matrix](#)

Please be explicit about where and how the program has incorporated the *California Dyslexia Guidelines* into the program (as a required text or other means).

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
	Evidence must be clear in both coursework and clinical practice.
<p>Additionally, the program helps candidates understand how to collaborate with families and guardians, multidisciplinary teams (including, but not limited to, general education teachers, reading/language arts specialists, speech-language pathologists, school psychologists, occupational therapists, physical therapists, and Deaf and Hard of Hearing and Visual Impairment teachers and specialists), and others to offer additional assessment⁹ and instructional support. The program also teaches candidates to provide appropriate adaptations (accommodations and modifications) and assistive technology that ensure equitable access to the curriculum for students with disabilities, including strategies such as fingerspelling decoding or pre-braille skills to support students who are deafblind or have visual impairments or blindness, as appropriate. The program addresses the importance of facilitating and supporting students' self-advocacy skills based on their individual needs to ensure access to appropriate adaptations (accommodations, modifications, and when necessary, compensatory strategies). The program also teaches candidates to understand the distinction between the characteristics of emerging bi/multilingualism and the range of learning disabilities. Candidates learn to collaborate with language development specialists to select appropriate assessments, review multiple factors when determining special education eligibility, and use assessment accommodations to ensure that multilingual and EL students are neither over- nor under-identified with disabilities and to provide needed and appropriate interventions.^{10*}</p> <p>*The text of this section of the standard continues below.</p>	Please see page 15 for guidance.

⁹ See [Preliminary Education Specialist Credential Teaching Performance Expectations](#), Domain 5: Assessing Student Learning, for Mild to Moderate Support Needs and Extensive Support Needs for additional information.

¹⁰ See the California Department of Education 2019 publication, [California Practitioners Guide for Educating English Learners with Disabilities for additional information](#).

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>The program incorporates the <i>California Dyslexia Guidelines</i>¹¹ through literacy coursework and supervised field experiences that include the definition of dyslexia and its characteristics; screening and diagnostic assessment to determine literacy profiles and the risk for dyslexia and other potential reading and writing difficulties or disabilities; and effective approaches for teaching and adapting/differentiating instruction for students at risk for and with dyslexia and other literacy-related disabilities. Candidates learn that guiding principles for educating students at risk for and with dyslexia and other literacy-related disabilities are anchored in valid assessment and instructional practices that are evidence based and that incorporate structured literacy (i.e., instruction that is comprehensive, systematic, explicit, cumulative, and multimodal and that includes phonology, orthography, phonics, morphology, syntax, and semantics) along with other cognitive and perceptual supports.</p>	<p>Please see page 15 for guidance.</p>

¹¹ See [California Education Code 44259\(b\)\(4\)](#)

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>7g. Integrated and Designated English Language Development</p> <p>Coursework and supervised field experiences emphasize that ELD should be integrated into ELA and all other content instruction and build on students’ cultural and linguistic assets, including their home languages and dialects. The program also emphasizes that comprehensive ELD includes both integrated and designated ELD and is part of Tier 1 instruction. Candidates learn how integrated and designated ELD are related, building into and from one another, and how designated ELD should be taught in connection with (rather than isolated from) content areas and topics. Through coursework and supervised field experiences, candidates learn to provide integrated ELD in which English learner students are taught to use and understand English to access and make meaning of academic content throughout the school day and across disciplines. Candidates learn to use the ELA/literacy standards (or other content standards) and ELD standards in tandem¹² to plan instruction that advances English learner students’ academic and language development, strengthening students’ abilities to use academic English as they simultaneously learn content. The program teaches candidates to design instruction that is appropriate for English learner students’ literacy profiles, levels of English language proficiency, and prior educational experiences. Candidates also learn to design instruction that develops students’ abilities to use English purposefully, interact in meaningful ways, and understand how English works. To the extent possible, the program provides supervised field experiences for candidates that include English learner students and recently reclassified English learner students.*</p> <p>*The text of this section of the standard continues below.</p>	<p>Describe how the program includes each aspect of Integrated and Designated ELD as described in this part of the standard (7g).</p> <p>Candidates will explore various models of ELD service delivery in EDF 703 and EDSMM 751. They will develop their understanding of how ELD can be provided to across educational settings.</p> <p>Candidates will, to the extent possible, be placed at school sites that include English learner students and require ELD instruction.</p> <p>Please make sure your response addresses all aspects of this part of the standard (7g).</p> <p>Provide links to syllabi and any other appropriate evidence that supports the narrative.</p> <p>Matrix</p> <p>Evidence must be clear in both coursework and clinical practice.</p>

Program Standard 7: Effective Literacy Instruction for Students with Disabilities	Evidence Guidance
<p>Through the program, candidates learn that designated ELD is a part of the regular school day in which English learner students are taught English language skills critical for engaging in grade-level content learning. Candidates learn that designated ELD instruction is tailored to students' proficiency on the English language development continuum, based on the ELD standards. Candidates also learn to use the ELD standards as the focus of instruction in ways that support content area instruction, building into and from specific topics of study. Through the program, candidates learn the importance of coordinating with classroom teachers and other specialists and supporting classroom instruction so that English learner students with disabilities receive comprehensive ELD instruction.</p>	<p>Please see page 18 for guidance.</p>
<p>7h. Literacy Teaching Performance Expectations and Supervised Clinical Practice</p> <p>The program teaches all elements of the Literacy Teaching Performance Expectations and provides instruction, practice, and informal feedback and self-assessment focused on the knowledge, skills, and abilities required by any required local and/or state literacy performance assessments. Supervised, guided practice in clinical settings¹³ provides opportunities for candidates to apply what they have learned and to gain feedback on how to improve and/or develop their practice to meet the learning needs of their students.</p>	<p>Please provide an overview of how reading and literacy instruction is incorporated into clinical practice experiences for every candidate as well as any other information related to Literacy Teaching Performance Expectations and supervised clinical practice that has not already been discussed in the sections above.</p> <p>Please provide links to appropriate evidence that supports this narrative.</p> <p>Student Teaching Handbook</p>

¹³ See [Preliminary Education Specialist Credential Program Standards](#), Standard 2: Preparing Candidates to Master the *Teaching Performance Expectations* and Standard 3: Clinical Practice, for additional information.
