

Oswin Interrogation Question List

How to use this document:

List here, any questions you have tried that gave no meaningful answer. I need exact wording so I can see if something's breaking in the code as well as if there's a double up somewhere or me just not coding in a particular way of phrasing a question.

I'll go back in and comment in/take off the list questions I've put in and addressed on my end.

This is not a guide to this segment of the game, but more a troubleshooting/improvements document.

Okay but I guess if you look at the list at the bottom you can have some freebie questions if you're on the corresponding build.

How the questions work in-game:

So the code parses what you ask Oz by breaking down the question into words, checks the individual words for keyphrases and combines them to get the answer. For example, just typing in the word "study" is going to get you nothing (as should be the case when you approach someone randomly and just say "study").

But if you instead ask "Where is the study?" this will see both 'study' and 'where', assuming you're asking for its location, and give you a response accordingly. This does mean that if you break down the keywords to their triggers, you can get the same response just by typing "study where" and it'll work. It's a limitation of the code, and something I kinda had to hand wave to keep it interesting and also factoring people that don't speak English as a first language.

However, there are some prompts that require multiple words in their phrasing. An example of this would be the line of questioning about if there's someone else present. For instance just saying "someone mansion" won't work, but "someone in the mansion" will as that's the designated phrase. Approach these as actual questions and you might have a better time finding where this breaks.
