

## Project Update

### 1. Opening Frame (0–5s)

Text Slide or Logo Animation:

"Litedares Consult Presents" or "Project Journey: From Bushland to Dream Home"

Background music begins softly.

### 2. Scene 1: Bushland / Before (5–15s)

Show 2–3 images/videos of the bushland where the building will stand.

Use a slight zoom or pan effect to add movement.

Voiceover (Example):

"Every masterpiece begins with a blank canvas... or in this case, a quiet stretch of land waiting for purpose."

### 3. Scene 2: 3D Design (15–25s)

Show the 3D renderings of the 5-bedroom duplex.

Add animated transitions between angles or features (aerial view, front, interior peek if available).

Voiceover:

"At Litedares, we don't just build houses—we visualize the future. Here's what we see rising from this earth—a modern 5-bedroom duplex, built with intention, elegance, and sustainability."

### 4. Scene 3: Foundation Progress (25–45s)

Transition into real-time footage/pictures of excavation, formwork, steel laying, and foundation pouring.

Mix 2–3 photos and short video clips.

Voiceover:

"We've laid the groundwork—literally. From site clearance to solid foundation, every block, every beam is a step closer to delivering a home that tells a story of excellence."

### 5. Closing Scene (45s–end)

Fade to Litedares logo and contact details / call to action.

Optional: "Follow the journey. Watch us build dreams, brick by brick."

Voiceover:

"The journey has just begun. Stay with us as we shape spaces, one project at a time. Because at Litedares, your vision is our blueprint."

2)

#### **Scene 1: Opening**

- **Image:** Logo or project cover (optional)
  - **Text (centered):**  
*"From Vision to Reality"*  
(Use fade-in animation)
  - **Duration:** 3–4 seconds
  - **Effect:** Add soft zoom-in for dynamic movement
- 

#### **Scene 2: Sketch Image 1**

- **Image:** First sketch image
  - **Text (bottom or center):**  
*"Initial Design Concept"*
  - **Effect:** Slide-in text or gentle pan
- 

#### **Scene 3: Sketch Image 2**

- **Image:** Second sketch image
- **Text:**  
*"Blending Function with Form"*
- **Optional:** Add semi-transparent overlay for contrast

---

#### Scene 4: 3D Design 1

- **Image:** First 3D view (front elevation)
