#### Description

Ventolin (generic name: Albuterol / Salbutamol; brand names: Ventorlin / Asthalin / Proventil / ProAir / Salamol / Aerolin) is a bronchodilator used for treating or preventing breathing problems in patients who have asthma or certain other airway diseases. Ventolin inhaler is called a 'reliever puffer' as it provides quick relief from sudden asthma attacks.

Ventolin is indicated for the relief and prevention of airway obstruction (bronchospasm) in patients with asthma and in patients with exercise-induced asthma. Ventolin can also be used in treating patients with emphysema and chronic bronchitis when their symptoms are related to reversible airway obstruction.

Ventolin works by relaxing the smooth muscle in the airway, which allows air to flow in and out of the lungs more easily.

The inhaled form of Ventolin starts working within 15 minutes and can last up to 6 hours.

## Albuterol over the counter

Ennis was backed by the Larry Willis Trio, which also played two sets of its own. Willis, a New York pianist who has recorded with everyone from Freddie Hubbard to Roy Hargrove, has been a Maryland resident since 1989 and a Baltimore resident since Backed by bassist Steve Novosel and drummer Eric Kennedy, the keyboardist made the audience remember all the times Horace Silver played the Famous Ballroom, for Willis had the same knack for ear-grabbing themes and leg-grabbing grooves. When the trio turned to Willis own compositions, such as "Ethiopia" and "To Wisdom the Prize," the dramatic swings between the quiet introductions and Kennedy's climactic outbursts, between the pianists murmuring melodies and dense, two-handed harmonies, provided the evenings highlights.
