Subject Line: Make YouTube Ads that get viewers glued to their screens and turn them into leads

Did you know that 65% of people skip Every Single Ad they see on YouTube?

That's lots of customers you're NOT attracting (making).

Thankfully, there is an easy way to grab people's full attention from the very first second of any Ad.

After your Ad pops on the viewer's (their) screen, they will immediately forget the Skip button exists.

This weird advertising trick will make people completely forget about the video they came for and solely focus on finding the link to your website.
