<u><b>TITLE:</b></u>	Mad Hatter's Tea Table
<u><b>DESIGN</b></u>	
<u><b>RECOGNISE THE NEED...</b></u> <u><b>WHAT IS THE PROBLEM THAT YOU NEED TO CREATE SOMETHING FOR</b></u>	Mad Hatter's old tea table is breaking down, and he had people coming over so he asked me to make another for him, we needed to make 4 sides for 4 people. What we needed was: 4 straws, 5 sheets of paper, string, and tape.
<u><b>GENERATE IDEAS</b></u> <u><b>COMPLETE SOME RESEARCH TO SUPPORT A SOLUTION.</b></u>	<p>We need a stronger and better table, we could also make it kinda crazy for Mr. Mad Hatter since he can be a bit CrAzY.</p> <p>Here are some tables from Google:</p> <div>   </div>
<u><b>DESIGN A PROTOTYPE AND RECORD YOUR IDEAS ABOUT WHY IT IS THE BEST SOLUTION.</b></u>	Our table had the straws go through a bit of the paper so we didn't have to use tape, we only used a bit of tape which was good.
<u><b>REFLECTION</b></u> <u><b>THESE ARE OUR RESULTS....</b></u>	Our result was a bit bad cause the table was kinda off to the side but Mad Hatter liked it and it balanced 5 M&M's and it was a success, although, at the end, it got destroyed by an accident the next day.
