

Privacy Policy for EduHelp

This Privacy Policy describes how our Chrome Extension ("Study Assistant") handles user data.

1. Data Collection

We do not collect or store any personally identifiable information, financial data, or browsing history on our servers.

2. Data Usage & Transmission

The extension only accesses "Website Content" (specifically text from the active tab) when the user interacts with the tool to analyze study materials or essay prompts. This text is securely transmitted directly to the official Google Gemini API to generate educational responses and explanations.

3. Data Security

Your Gemini API key and settings are stored locally on your device via the chrome.storage API and are never shared with third parties. We comply strictly with the Google Chrome Web Store Developer Program Policies, ensuring that no user data is sold or used for unrelated purposes.
