Dear ,

On November 11 2024, Richard Allen was wrongly convicted for the murders of Abigail Williams and Liberty German in Delphi, Indiana. The investigation and trial have been marred by judicial and police incompetence and corruption. There is too much to detail in a brief letter but some of the highlights are below.

- Mr. Allen was kept in solitary confinement for a year and half
- While in solitary he had a psychotic break and his words were used at trial
- Judge Gull threatened his attorneys to get them off the case
- The Indiana Supreme Court intervened and they were put back on the case
- Police from other agencies communicated to Delphi police about other suspects and were repeatedly ignored
- Another man confessed to the crime which was ignored by Delphi Police and was not allowed at trial
- The prosecutor and judge conspired to exclude a wealth of material and potentially exculpatory evidence, including phone geofencing which showed other people than Mr. Allen were at the crime scene at the alleged time of the murders
- There is credible evidence that the murders were done by an organized crime syndicate

I am asking you and your colleagues to please research and get involved in this case. Please read the first Franks Memo submitted by the defense. We need our legislature to form a committee to investigate what happened at delphi. We specifically need you to look at the corrupt investigation, the illegal detaining of Richard Allen in solitary confinement, and the one sided and unethical behavior of Judge Gull. There are real fears for Mr. Allen's safety and time is off the essence

More information, including court documents, can be found at:
