

Privacy Policy for ENFUEGO Yahoo Fantasy Draft CoPilot

Last Updated: October 2, 2026

ENFUEGO Yahoo Fantasy Draft CoPilot ("the Extension") is dedicated to protecting your privacy. This policy explains what information is handled by the extension and how it is used.

1. Information Handled by the Extension

- **Draft Room Data:** The Extension reads live draft room data on Yahoo Fantasy (such as player names, bids, nominations, and pick orders) solely to calculate live valuations, category rankings, and draft adherence.
- **Local Preferences:** User settings (such as draft format, punt strategies, and target budgets) are stored locally in your browser using Chrome's local storage API ([chrome.storage.local](#)).
- **License Verification:** If a paid Draft Pass is activated, an anonymous verification token is processed via secure billing providers (Stripe) to confirm access.

2. What We DO NOT Collect or Share

- We do **not** collect or store personal identifying information (PII) such as passwords, real names, or financial payment details.
- We do **not** sell, rent, or trade user data to any third parties or advertisers.
- We do **not** use your data for advertising, creditworthiness, or tracking across unrelated websites.

3. Data Storage & Security

All draft calculations and simulation algorithms execute locally on your device within your browser session. No personal draft data is stored on external private servers without your explicit action.

4. Contact

If you have questions regarding this Privacy Policy, please contact the developer via the official Chrome Web Store extension support page.
