Optimization Checklist	☐ Use the primary keyword within the first 100 words of your content ☐ Use keyword variations in substitute of the primary keyword within your content ☐ Add relevant internal links using targeted anchor text ☐ Add relevant external links to reliable websites but prioritize linking to internal pages, if there are any ☐ Make your content easier to read and scan by using shorter paragraphs ☐ Provide data tables and bullet lists, if applicable ☐ Check for relevant People Also Ask questions and address them in our content. You may wrap these PAA questions in h2, h3, or h4 tags. ☐ Use proper hierarchy of heading tags - only use H1 for the Title

Outline

Note: Create content that comprehensively talks about how long consuming any form of suboxone takes to kick in, and answer the most frequently asked questions about the administration of suboxone. Make sure to integrate all possible secondary and keyword variation within the article so that it is able to compete against similar ranking pages across different SERPs.

Note: You may change/remove/add headings..

Opening paragraph (100 - 200 words).

- Start with a “hook” that will entice the audience and empathizes with the reader on a problem or difficulty
- Explain the problem/point of discussion in further detail
- Explain how you’ll fix the problem/answer the question through the content you’ve curated
- Transition into the body where you’ll explain the curated content further
- **Key terms to include here:** [Suboxone](#); what does suboxone look like; suboxone images

[h2] What forms do Suboxone come in?
