Personal Projects

Job Portal

MERN Stack

February 2025 – May 2025

- Built a full-stack job listing platform with user authentication, resume uploads, and job filtering using MongoDB, Express.js, React, and Node.js
- Designed responsive front-end interfaces with React, enabling job posting for employers and applications for candidates.

Shoe Ecom

Flutter

February 2025 – May 2025

- Developed a mobile e-commerce app for shoes with a product catalog, cart system, and checkout process, integrated with Firebase.
- Designed user-friendly UI in Figma, ensuring seamless navigation and responsive layouts.

Wedding Planner

Laravel

January 2024 – April 2024

- Developed a full-featured Marriage Event Management System with user/admin authentication, booking management, and feedback modules.
- Designed responsive front-end interfaces with HTML, CSS, and JavaScript for enhanced user engagement

Practical Exam Management

Django

July 2023 – September 2023

- Built a Django-based web app for students to view exam timetables/results and for teachers/admins to manage assignments and marks.
- Implemented secure user authentication and role-based access for efficient exam management

GYM Management System

Laravel

January 2023 – March 2023

- Developed a GYM management system using Laravel, allowing users to view personalized diet plans and manage memberships online.

Hotel Management System

PHP

September 2022 – December 2022

- Created a comprehensive hotel management system with a dual-interface for admin and users. The system handled bookings, room management, and user inquiries efficiently.
