Examples by: SchoolHouse Rock!

Crossword

Create a crossword puzzle in which the answers are products or quotients between 2-5 digits. Must have at least 10 answers down and 10 answers across.

Array City

Build your own array city with towering skyscrapers! The windows will represent the array (rows & columns). Your city **must** include at least 5 different structures/buildings.

Collage

Create a collage of pictures that shows various examples of real-world multiplication and division applications. Make sure to include captions that explain how the multiplication and division is being used.

Creative Choice

Develop your own plan to share your multiplication and division knowledge! Show your teacher the plan first!

Matching Game

Create a set of cards with multiplication and division story problems. Then create matching cards that have the correct answers.

Tape it up!

Conduct a survey of your classmates, and develop six word problems with tape/strip diagrams involving your data. Submit the problems and the solutions showing all your work.

Libraries of Love

Your school has asked for **your** help in purchasing some new bookcases. The shelves must fit 25 books on each shelf and come with either 4, 6, or 8 shelves in each bookcase. They have 300 new books. Create a diagram that shows **each** possibility.

Sweet Beets!

Create a diagram of our classroom garden bed. In the garden bed create rows and columns of beet plants. Create 5 multiplication word problems and 5 division word problems for students to answer.

Circle the box you plan to complete and attach this page to your product.

All products are due by: **Friday, November 30**
