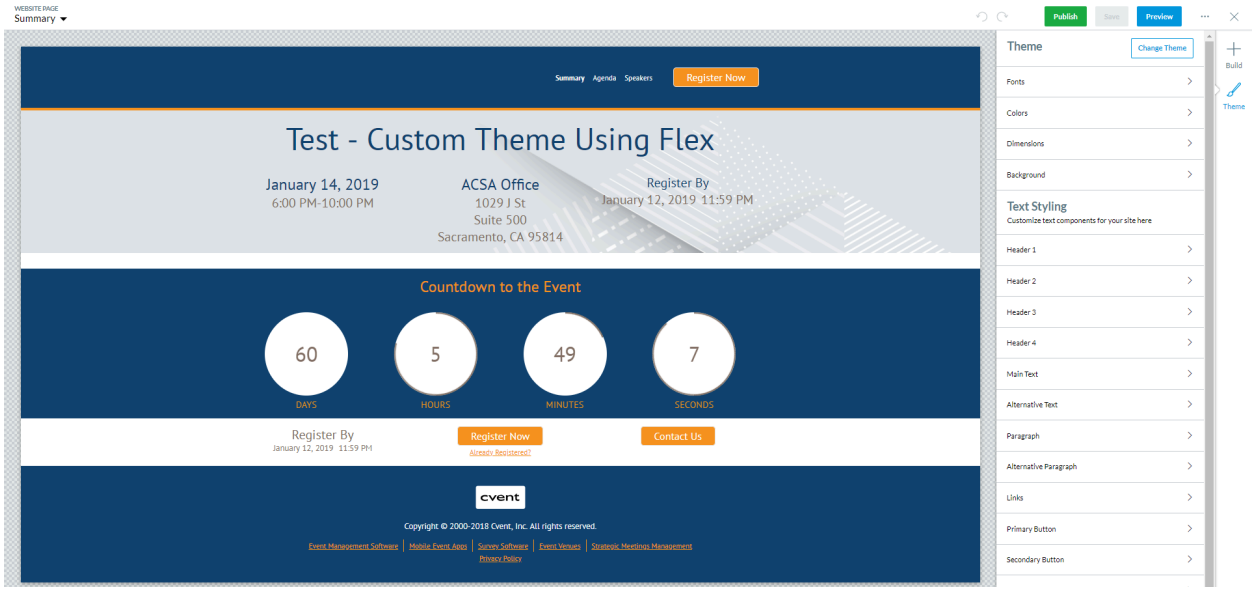
25. Click on the X at the top left of the Fields Button panel
26. Click on Labels and enter #F7931E for the Text Color
27. Click on the X at the top left of the Links panel

***Note**

As you build out you event you will need to customize some of the widgets. (e.g. For the Event Date & Time you will want to select the block and click on Customize. Then select Date and enter #114572 for the Text Color, then go back and select Time and enter #837165.)

Once you are done the theme should look like this…



You can also refer to a sample event that was created using Flex. Just log into Cvent and in Events search for Test - Custom Theme Using Flex.
