

Additional Information

1. Please describe any standard equipment that will be required to complete this project (standard technology and ocean research equipment). An overview of equipment available on the R/V Falkor (too) is available, generally described [here](#), and detailed specifications [here](#).
2. Please describe any equipment you will need to bring onto the ship to complete this project such as prototype technology, specialized equipment, etc.
3. Please describe any date or timeline constraints that should be considered (i.e. travel only possible after X date, X time needed on ship to carry out proposed work, etc.).
4. Please describe any location restrictions or preferences (general regions, coordinates not required; if work is not location specific, please note that here).
5. Are you proposing a stand-alone project, or will the work you are proposing in this application be a part of a planned SOI research cruise? If the latter, have you spoken with the lead PI on that cruise before submitting this proposal?
