Installation Guide for AR Application on Android Devices

Introduction

Welcome to the installation guide for our AR application on Android devices. This document will walk you through the steps required to successfully install and set up the application on your Android device.

System Requirements

Before starting the installation, ensure that your Android device meets the following requirements:

- Android version 7.0 (Nougat) or later
- Stable internet connection for downloading the application
- Sufficient storage space for the application

Prerequisites

Make sure you have the following prerequisites ready:

1. An Android device
2. Access to the application package file (APK)
3. A file manager application on your Android device

Enabling Unknown Sources

To enable the installation of apps from unknown sources:

1. Open the Settings app on your Android device.
2. Navigate to Security or Privacy (depending on your device).
3. Find the Unknown Sources option and enable it. You may need to confirm this action.

Installing the Application

Step 1: Download the APK File

1. Download the APK file containing the AR application from the provided link or source.

Step 2: Transfer the APK File to Your Android Device

1. Connect your Android device to your PC using a USB cable or use a cloud service to transfer the APK file.
2. Move the APK file to a folder on your Android device where it is easy to find (e.g., the Downloads folder).

Step 3: Install the Application

1. Open the File Manager app on your Android device.
2. Navigate to the folder where you transferred the APK file.
3. Tap on the APK file to start the installation.
4. Follow the on-screen instructions to complete the installation.

Launching the Application

1. Once the installation is complete, you will see a notification or the application icon in your app drawer.
2. Tap on the application icon to launch it.

Troubleshooting

If you encounter any issues during installation, try the following steps:
- Ensure your Android device is running a compatible version of the OS.
- Check if the Unknown Sources option is enabled in your device settings.
- Restart your Android device and try the installation again.
- Ensure the APK file is not corrupted by downloading it again from the source.
