Atomos Is offering Student and educational discounts on the Ninja Assassin. Looking to record 4k via HDMI, find a student in the family and [you can pick one up for \\$746.](#)

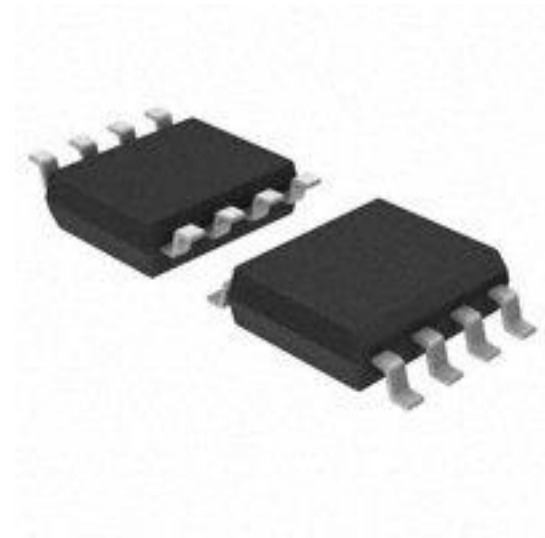

Shooting on a [Kipon](#) or Metabones adapter? [New firmware updates](#) are out for both.

[DIY LX100 Audio hack](#)

[Jim Williams Mod](#)

[Upgrade company OADE](#)

Jim Williams of Audio Upgrades has modified his DR-70D to improve its performance, and he has agreed to share the details publicly since he does not sell the mod himself.

“2 SOIC LME49720MA opamps are replaced for the mic preamps. There are 3 upc4580 dual opamps on the other side of the pcb, those do line out functions. I replaced those as well. The last step is adding WIMA MKP-2 250V .01 uf poly film caps across the 8 22uf/63V phantom blocking caps. Any surface mount repair shop can do this work as several have already had that done with great success.

**Regards, Jim Williams
