

Poultry (Broiler)

PRODUCTION TECHNICIAN

Training Manual Version: 2017 Poultry - Broiler Technician

HOW TO USE THE RECORD OF COMPETENCE

TRAINEE'S NAME: Trainee clearly prints their full—complete name

- this is how it will appear on their certificate upon completion

TRAINER(S) DECLARATION: All Trainer(s) involved in learning and skill development must be listed

- trainer(s) clearly print's their name and provide example of their initials

3. **TRAINING PERIOD SELECTION:** Trainer(s) and trainee choose training period X or Y or Z for starting their skill development

4. **TRAINER(S) INITIALS APPROPRIATE SKILL BOX:** The trainer(s) mentor the trainee's skill development using the content of this book

- references the skills they mentored the trainee in
- as skill competency is achieved, the trainer(s) can test the trainee's skills at their training site and indicate this achievement by initialing the skill box on the Record of Competence

TRAINEE IS READY FOR CERTIFICATION TESTING: All required skills in training period are verified and initialed by the trainer(s)

- trainee brings book to certification testing

CERTIFICATION TESTING: Regional Coordinator ensures all skills for the training period are verified and initialed by the trainer(s)

- certification tester uses the trainee's curriculum book during the certification test
- certification tester provides feedback notes to the trainee and their trainer(s)

7. **CERTIFICATION TESTER VALIDATES AND SIGNS**

RECORD OF COMPETENCE: Certification tester verifies trainee's ability and competence is evaluated above 65% in all five tested skills

- certificate tester dates and signs the "Regional Certificate Tester Validation" section of the record of competence

POULTRY—BROILER CHICKEN

TRAINER(S) DECLARATION—LIST OF TRAINERS

Production Technician

Record of Competence for:

Trainee's full given name (print clearly)

All skills within a training period must be completed in their entirety as a group. Training periods are generally structured to accommodate the seasonal nature of agricultural operations and do not need to be trained upon sequentially.

X: Poultry Operations and Care (6 credits)

Y: Poultry Process and Practices (5 credits)

Z: Poultry Husbandry and Systems (5 credits)

The following job-site trainer(s) have agreed to support the training and development of the competency requirements as described in this Green Certificate Program Manual.

Please clearly **PRINT** name(s) and sample initial below.

Green Certificate Training Process

Training & Test Preparation

Regional Certification Testing

Trainee attends Regional Certification Testing Event bringing with them their Green Certificate training manual and their Trainer's "signed off" Record of Competence sheet.

Trainee is matched with a Certification Tester. Tester evaluates the trainee's ability and competence on 5 skills, randomly chosen, from their selected training period of study.

If trainee's ability and competence is evaluated **below 65%** in one or more tested skills:

- ☐ tester will provide feedback (task(s) requiring additional skill development) to the trainee and the trainer via the test report.
- ☐ trainee returns to training process and enhance their skill development to apply for a retest on that training period.

If the trainee's ability and competence is evaluated **above 65%** in all five tested skills:

- ☐ tester will provide feedback via test report and the trainee is given a grade based on their performance.
- ☐ School Coordinator uses this information to apply for the training period's credits and submits the mark to Alberta Education.

The test report is validated and signed by the trainee, tester and Regional Coordinator.

Trainee, trainer, School Coordinator are given the results of the Certification Testing Event.

Trainee returns to the **Green Certificate training process** to enhance their skill development or move on to their remaining training period(s).

Certification

When the trainee has successfully completed all three training periods and Regional Certification Tests, the regional coordinator will detach the trainee's signed Record of Competence and submit it to Alberta Agriculture and Forestry to verify their certification.

Alberta Agriculture and Forestry issues the Green Certificate to the trainee.

Alberta Agriculture and Forestry sends the trainee's Green Certificate portfolio (*Record of Competence and Green Certificate*) to their school for presentation to the student.

Technician Specialization:

Expected Tasks and Training Outline

A more detailed list of expected tasks is available upon request. Once registered, students will have access to the manual, which serves as a training guide. Please review the expectations for Modules X, Y, and Z to carefully plan the timing for completing each module, considering the required tasks. For example, winterizing the machinery cannot be done in the spring.

Trainer Certification

I certify that I am fully capable of acting as the trainer for this student. I have reviewed the Record of Competence, which outlines the necessary skills for course completion and testing. I am prepared to provide training opportunities for all tasks and will supervise their learning. I will assist the student in preparing for the Green Certificate Testing by ensuring that I only sign off on tasks that they can proficiently demonstrate.

Signature:

Date:

Once this form has been returned, the student will be registered in the course. Thank you for partnering in this student's learning journey and for agreeing to take them on as your trainee.
