

**Hit My Line** <https://songwhip.com/bobbie-rose/hit-my-line>

Hey it's me so ever since last night I got a lot on my mind so enjoy this message

Boy after last night  
After everything we've been through  
All I wanna do is be with you  
But this seems to be like a game of clue  
I don't know if you're into me  
If you just like the intimate space that we got  
The time that we share  
But we not cuffed up  
So boy what's going on here

I ain't that girl that you can just play all these games with  
I do know that I am no lame bitch  
No no no no

Boy just be with me  
And everything will be complete  
I just wanna be able to call you mine  
Every time we go through this  
We go up we go down  
We go this way go that way but we both know  
That together is the only right way to go

Boy just lemme know what you tryna do  
Cause i've poured my heart out so many times for you  
I don't even know why I keep on trying  
just know that the clock goes tick tick tick  
When it blows off your time is done  
And if you don't hit my line  
I got guys lined up around the block just waiting for their time to shine  
Bye bye

I ain't that girl that you can just play all these games with  
I do know that I am no lame bitch  
no no no no

Boy just be with me  
And everything will be complete  
I just wanna be able to call you mine  
Every time we go through this  
We go up we go down

We go this way go that way but we both know  
That together is the only right way to go

You know where I be at  
You know the number  
You know how to get in touch babe  
So after listening  
I hope you know I'm for real  
But if you're not than goodbye

**Wusgood** <https://songwhip.com/bobbie-rose/wusgood>

I'm not tryna be your girl  
I'm just tryna rock ya world  
For the night maybe a couple more  
Sit by your phone and just wait for it

I walk into the room I see what I want  
No time to waste so I gotta shoot my shot  
If you think I won't make the first move you must have forgot  
That imma be direct  
It's clear that we connect  
So let's go back to my crib it's time to inspect  
How we vibe  
How we move  
How we set each other's moods  
But don't get it misconstrued

I'm not tryna be your girl  
I'm just tryna rock ya world  
For the night maybe a couple more  
Just stick by your phone and you'll see how boring your life was before

You know I hit you with that wusgood text late at night  
You gonna come over to get a bite  
You know you can't resist  
You'll think about what you missed  
With this real Jersey bitch<sup>[OBJ]</sup>  
You know I hit you with that wusgood text late at night  
You gonna come over to get a bite  
You know you can't resist  
You'll think about what you missed  
With this real Jersey bitch<sup>[OBJ]</sup>

I can tell you're loving everything that I got  
Nothing I do was every taught  
Boy don't get confused you're not the only one  
Boy you thought  
I make my selection  
At my own discretion  
But don't  
Don't look at me like I'm your possession

I'm not tryna be your girl

I'm just tryna rock ya world  
For the night maybe a couple more  
Sit by your phone and just wait for it

You know I hit you with that wusgood text late at night  
You gonna come over to get a bite  
You know you can't resist  
You'll think about what you missed  
With this real Jersey bitch<sup>[OBJ]</sup>  
You know I hit you with that wusgood text late at night  
You gonna come over to get a bite  
You know you can't resist  
You'll think about what you missed  
With this real Jersey bitch<sup>[OBJ]</sup>

I know you'll be fantasizing bout me  
Every second, every hour, every day baby  
It happens with all of y'all  
You get one taste and you get hooked so  
Just wait for me to say it  
Just wait for me to say it  
And you gon' get the good time you want  
So wusgood

**The One** <https://songwhip.com/bobbie-rose/the-one>

We got that great chemistry  
I'm falling so helplessly  
I can't seem to shake ya  
Don't wanna replace ya  
Cause you got the best of me  
You've seen my weird side  
When tears pour down my eyes  
Believe me when I say that I'm not like this with them other guys

Why do I gotta keep waiting  
I should be able to be there  
Where I wanna be  
Where you are  
With you  
So just stop playing and make me the one

No need for astrology  
It's all about psychology  
I wanna know your mind  
How you're one of a kind  
Everything please let me know  
Can tell you've been hurt  
A tad bit introvert  
But any girl that gets to be with you just won the lottery (Yeah)

Why do I gotta keep waiting  
I should be able to be there

In your arms  
Holding me tight  
The only time I feel alright  
You said you've been hurt  
So have I  
So broken I have to put on a disguise  
I know I won't have to deal with that when I'm with you  
Around you I no longer feel blue

Why do I gotta keep waiting  
I should be able to be there  
Where I wanna be  
Where you are  
With you

So just stop playing and make me the one

I just wanna be with you

Don't you think this is enough of what you put me through

Cause I've been waiting

And waiting

To just say that we're dating

So come on

Just look me in the eyes

Tell me that you've realized

It's no longer you and I

It's now us

Say that you want me

Say, say I'm the one

I'll be waiting for that day to come
