

Whitepaper

(A short quote from the Whitepaper our team is currently working on)

Project description

It is part of the 1721 clumsy moose , each with its own identity that is different and unique. The clumsy moose struggle day in and day out to make a living for themselves. They can do whatever they want, for this reason they are always in trouble, so sometimes they may not even need a reason to live. The Moose was created in that cartoon style. In this world you can own a clumsy Moose to save them from being clumsy.

The features are:

1. Background
 2. Body
 3. Antler
 4. Eyes
 5. Clothes
 6. Accessories
 7. Headgear
-

Token and Ecosystem

Our website is built with care, precision and lot's hours of work. Professionally trained on Cardano and our own Token.

And why do we say this?

Because with the launch of our Token ecosystem which is called \$CLMU, *it will be possible to pay with this cryptocurrency on both the second Public and White List mint, with the ADA of course.*

But why would you choose our currency over the quite common ADA?

Because it's an extra 5% discount for everyone, like NFT on Minting as well as on merchandise purchases when you pay with our Token.

How much Clumsy Moose Token will you get for 1 ADA?

The answer is 10 \$CLMU. Once you reach 3,000 Twitter followers, we will open the official Token minting option whereby you will receive 10 Clumsy Moose Tokens back for every ADA you send.

An example: If you send 80 ADA you will get back 800 \$CLMU ($80 * 10 = 800$).

The total supply of tokens?

We calculated and thought about which token volume and distribution would be the best from a project perspective.

And we came up with a full set: **1.721.000.000 Token** will be the total stock.

How did we plan the Token distribution?

Open for sale: 40% of Token - 688.400.000

We keep 10% of Token that is the team treasury - 172.100.000

Another 10% of Token for Air Drops - 172.100.000

5% of the Token goes for charity - 86.050.000

The remaining 35% of Token goes for the Stake pool / paying reward of stakers - 602.350.000

You can finally buy \$CLMU Tokens through: <https://clumsymoose.com/mint>

[A little help if you want to mint 1 NFT from our Token you must have 510 \$CLMU Token. So you need to buy 51 ADA worth of \$CLMU.]

1 ADA = 10\$CLMU

Anyone who buys \$CLMU Tokens worth at least 10 ADA in addition to receiving the corresponding amount of \$CLMU Tokens in return (100 \$CLMU) will automatically be entered into our huge giveaway where we will AirDrop 50 ADA between 5x lucky Token holders.

And here is the thing, why is it worth it?

The answer is that you can use the Token to buy anything on our website for cheaper.

For example: 55 ADA is the mint price of a piece of NFT (That's 550 in \$CLMU Token).

But if you want to mint the NFT with \$CLMU Tokens, you only have to pay 51 ADA worth of Tokens to get an NFT. It will cost you 510\$CLMU.

In addition, the same discounts will be available to anyone who pays for any product on our website with \$CLUM Token instead of ADA. This applies to Merch products for Breeding fee, future Drop etc...

How to mint?

The minting process will be simple, no need to overthink it!

Follow these step under minting:

The address will publishing at 11th of October in  | major-announcement channel, but we'll also publishing on our website: <https://clumsymoose.com/mint> and Twitter page as well!

Public minting:

- Mint price is 55 ADA!
- Price in \$CLMU - 510\$CLMU!
- 11 OCT 2022 - 6pm UTC (18:00)

Moose Listed (WL):

- Mint price is 45 ADA!
- Price in \$CLMU - 420!
- 11 OCT 2022 - 4pm UTC (16:00)

Calculation help GUIDE via examples:

- If you mint the maximum NFTs at Public mint, you need to send 165 ADA in the tx ($55 * 3 = 165$).
- If you mint the maximum NFTs at Moose Listed (WL) mint, you need to send 135 ADA in the tx ($45 * 3 = 135$).

Follow these important rules for the minting:

- The most important thing to keep in mind is that we will not send DMs, if someone sends you a DM with one of our team member's name and profile please do not reply to them, they are a scammer!
- You can only save 3 NFT in a transaction. But you can send multiple transactions.
- Send the exact ADA amount to the address!

- Don't try to mint on Moose List Mint without Moose List (WL), because we won't return your ADAs or \$CLMU!!!

All chat will be closed before (10min) and during the start of the minting period, which will be 1 DAY.

And why will it be 1 DAY?

Because our goal is to allow everyone who wants to be able to save from our collection!

How to breeding?

This process will require at least two Moose NFTs.

1. The procedure works by first selecting the Breeding menu item on our website or using the link: <https://clumsymoose.com/breeding> (not working yet).
2. Second, you need to sync your wallet with our website.
3. In the third step, you choose which NFT you want to breed, and after paying the amount you want to breed, the process ends, and you get a new third NFT.

For the avoidance of doubt, you keep both previously minted NFTs, but you cannot use them more than once to breed.

(Each NFT produced gets an unused spawn point and breeding is done by changing the NFT's spawn point in the metadata from unused to used)

RoadMap

Phase One:

The total collection is 1721 NFT:

20% after sale - Launch of the first collection of merch, which you can buy under the Merch option on our website: <https://clumsymoose.com/merch>

35% after sale - Charity for the organization that works for the rescue and protection of animals etc...

55% after sale - Start building the Token ecosystem by publishing our tokens to the market so you can buy them. Distribution to holders after minting.
(no fixed date at the moment)

75% after the sale - AirDrop which will contain \$CLMU Token and ADA as well.

90% after sale - Our own token stake pool ranges from 6% APR.

100% after sale - NFT breeding, the cost of which can be financed in ADA and with our Token. You can find a more detailed description of breeding on our

# | how-to-breeding channel!

(5% discount applies here also to breeding paid with our Token)

Phase Two:

More detail, coming soon!
