Privacy Policy for CSS Lens

Last updated: [Current Date]

Data Collection and Usage
CSS Lens only collects the minimum data necessary for its core functionality:

1. Website Content Access
- We access webpage content solely to enable CSS style inspection and modification
- This access is limited to the active tab when the extension is enabled
- No website content is stored or transmitted

2. User Interaction Data
- We track mouse clicks and movements only within the extension interface
- This data is used exclusively for operating the CSS editor
- All interaction data is temporary and exists only in the active browser session

Data Storage
- No user data is stored permanently
- All data is temporary and limited to the current browser session
- No data is transmitted to external servers

Third-Party Access
- We do not share any data with third parties
- We do not sell or transfer any user data
- All functionality operates locally within your browser

Updates
This privacy policy may be updated occasionally. Users will be notified of any significant changes.
