

Nonary Game: Ambidex Edition

Zero III's Rules

Heeeellooo! I am Zero the III, and today I'm gonna give everybunny a game to play! Yes yes yes! And I'm calling it... The NONARY GAAAAAME! AMBIDEX EDITIOOOOON!

The rules are pretty simpawle, here, I'll show you!

The goal of the Nonary Game!

Your goal is pretty pretty simpawle! You all gotta escape from this bizarre game, and to do this everybunny starts the game with a bracelet displaying the number "3" on them, that number is your amount of [Bracelet Points], we'll call them [BP]. Once your BP reaches 9, then you are free to escape! But of course... *that ain't gonna happen*.

You all also have the great objective of figuring out who my master is! By that I mean Zero, the person who imprisoned you all in this game. And for thaaat... Everybunny will receive their own testibunny regarding the events that happened in the facility! Yay!

All players will have the chance to vote in the [Decision Game] another game I implanted where your objective is to simpawly vote for who Zero is!

Increasing your BP!

To increase your BP, everything you gotta do, is to play the Ambidex Game! Exactly! "Okay but how do I play this?" Simpawle!

You will be voting against somebunny in the AB game, the vote consists of betraying or allying your opponent.

However, don't forget that your opponent will also be voting against you! If in case you pick

betray and your opponent picks ally, then you will receive +3 BP while your opponent loses -2 BP, and so goes on:

		Opponent	
		Ally	Betray
You Partner	Ally	+ 2	- 2
	Betray	+ 3	+ 0

Buuut if your BP reaches 0... you die.

Now, there are two kinds of players, the pairs, and the solos. As the names suggests, the pair players will pair with someone in the AB Game, and the solo players will stay alone! How sad! Well, summarizing: A and B vs C.

How does the players wins the game?	How does Zero wins the game?
The win condition for players are as following: - Everyone except for Zero escapes the facility. - Players successfully votes for Zero in the [Decision Game] - Zero dies during the AB game Note: If you get 9 BP you only escape if other players get 9 BP too, but if Zero gets 9 BP the game is over, so choose wisely who you Ally/betray.	The win condition for Zero are as following: - Zero escapes the facility with 9 BP. - Zero does not gets the majority vote in the [Decision Game]

Zero III:
