

# Federal Grants

Grants can be applied for by players to help stimulate the economy and get projects going. Exceptions to these rules can be made if approved by the majority of Congress.

- To get any grant they must submit a proposal to explain why they need the money and how they will use it.
- Players must log how they spend the money on a spreadsheet given to them and overseen by the Treasurer.
- A player or entity can only receive 1 grant every 6 months.
- Players start out with only being able to apply for a grant up to 500g, if they make good use of the money and follow the rules they can apply for more money next time in increments of 500.
