

ACT PREP - WINTER CLASS
PRESENTED BY WISCONSIN TEST PREP at Evansville High School

Take the ACT Test only once. This class will teach you how to achieve your highest level the first time you take it. By focusing on the knowledge you need to be successful and specific tips to raise your overall score and beat the time clock: this course is the path to your best ACT score.

The ACT Prep Course consists of seven sessions that focus on the four ACT subject areas and test-taking strategies. Because course curriculum uses actual ACT test problems, students gain a distinct competitive edge on test day. For students taking the writing test, preparation will be included during the reading session.

Each session begins with an in depth guided study of how to maximize effectiveness by learning what shortcuts to look for and use for each specific subject. Afterwards the students take individual subject practice tests. They will also receive correct answers and explanations for each question. For the final session, students take a full three and a half hour practice ACT test on the Saturday prior to the State mandated test.

The knowledge of how to take the ACT Test, time management, and general test taking skills will be explored. Raising the ACT score is important for admission and scholarship opportunities.
