Abstrak

Abstrak harus ditulis dalam satu paragraf. Abstrak adalah ringkasan umum artikel atau penelitian dengan 150-200 kata. Untuk artikel penelitian, abstrak harus memberikan gambaran umum yang relevan tentang penelitian tersebut. Kami sangat menganjurkan penulis untuk menggunakan gaya abstrak terstruktur berikut, tetapi tanpa judul: (1) Latar Belakang: Tempatkan pertanyaan yang dibahas dalam konteks luas dan soroti tujuan penelitian; (2) Tujuan Penelitian: Mengidentifikasi maksud dan tujuan penelitian; (3) Metode: Jelaskan secara singkat metode utama atau kerangka teori yang diterapkan; (4) Hasil: Meringkas temuan utama artikel dan menunjukkan kesimpulan temuan penelitian; (5) Implikasi: Tunjukkan implikasi atau kontribusi penelitian, baik dalam teoritis maupun praktik.

Abstract

The abstract must be written in one paragraph. An abstract is a general summary of the article or study with 150-200 words. For research articles, abstracts should give a pertinent overview of the work. We strongly encourage authors to use the following style of structured abstracts, but without headings: (1) Background: Place the question addressed in a broad context and highlight the purpose of the study; (2) Purpose of the Study: Identify the purpose and objective of the study; (3) Methods: Describe briefly the main methods or theoretical framework applied; (4) Results: Summarize the article's main findings and main conclusions research result; (5) Implications: Demonstrate the implications or contributions of the research, both in theory and practice.

INTRODUCTION

The introduction should briefly place the study in a broad context and highlight why it is important. It should define the purpose of the work and its significance. The current state of the research field should be reviewed carefully, and key publications cited. Please highlight controversial and diverging hypotheses when necessary. Finally, briefly mention the main aim of the work and highlight the principal conclusions. As far as possible, please keep the introduction comprehensible to scientists outside your particular field of research. References should be cited as (Kamba, 2018) or (Marchlewska et al., 2019) or (Cichocka, 2016; Hidayat & Khalika, 2019; Ikhwan, 2019; Madjid, 2002) or (Miller & Josephs, 2009, p. 12) or Rakhmat (1989). See the end of the document for further details on references. Technical terms should be defined. Symbols, abbreviations, and acronyms should be defined the first time they are used. All tables and figures should be cited in numerical order.

METHODS

The research method should be included in the Introduction. The method contains an explanation of the research approach, subjects of the study, the conduct of the research procedure, the use of materials and instruments, data collection, and analysis techniques.

RESULT AND DISCUSSION

The results obtained from the research have to be supported by sufficient data. The research results and the discovery must be the answers, or the research hypothesis stated previously in the introduction part.

Subsection

Heading 1: use this style for level one headings

Heading 2: use this style for level two headings

Heading 3: use this style for level three headings

Heading 4: create the heading in italics.

Bulleted lists look like this:

- First bullet
- Second bullet
- Third bullet

Numbered lists can be added as follows:

1. First item
2. Second item
3. Third item

The text continues here.

(b)

Table 1. This is a table. Tables should be placed in the main text near to the first time they are cited.

Title 1	Title 2	Title 3
entry 1	data	data
entry 2	data	data 1

Formatting of Mathematical Components (if any)

$$a = 1, \quad (1)$$

Theorem-type environments (including propositions, lemmas, corollaries etc.) can be formatted as follows:

The text continues here.

Authors should discuss the results and how they can be interpreted from the perspective of previous studies and of the working hypotheses. The findings and

their implications should be discussed in the broadest context possible. Future research directions may also be highlighted. The following components should be covered in the discussion: How do your results relate to the original question or objectives outlined in the Introduction section (what/how)? Do you provide interpretation scientifically for each of your results or findings presented (why)? Are your results consistent with what other investigators have reported (what else)? Or are there any differences?

CONCLUSION

The conclusion should answer the objectives of the research and research discoveries. The concluding remark should not contain only the repetition of the results and discussions or abstract. You should also suggest future research and point out those that are underway.

REFERENCES

The literature listed in the References contains only the sources referenced or included in the article. We recommend preparing the references with a bibliography software package, such as Mendeley, EndNote, Reference Manager or Zotero to avoid typing mistakes and duplicated references. Referral sources should provide 80% of journal articles, proceedings, or research results from the last five years. Writing techniques bibliography, using the system cites APA (American Psychological Association) Style and the 6th edition.
