⇒Learn about the History of Sandbranch TX

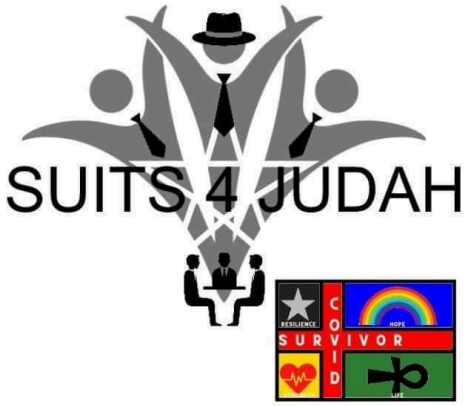

Sand Branch (sometimes spelled Sandbranch) is an unincorporated community in Dallas County, Texas, United States. According to the Handbook of Texas, the community had an estimated population of 400 in 2000.[1] The community did not participate in the 2010 Census. More recent (2019) estimates put the population around 100.[2]The Sand Branch Community has long been considered one of the poorest areas in Dallas County and community was formed for freed African-American families but the original families have been forced out by poor living conditions or forced to sell their land for as low as $300 .[3] The area's living conditions and lack of basic services have led some to label the largely lower-income, predominately African-American community a "non-border colonia" because of its similarities to those

settlements situated along the southwestern United States border with Mexico.[4] One of the challenges of the community is that residents must transport water to use it: despite existing next to a Wastewater Treatment facility. No water infrastructure exists in Sand Branch (due to its unincorporated status), and the wells are non-potable due to decades of contamination.[5] Wikipedia
