

# CONSIGNMENT & TRADE IN GUIDE

What We're Currently  
Accepting at Pando

Last updated: March 21, 2025

## A Note From the Pando Team

We want you to be successful selling your outdoor goods at Pando! These guidelines are designed to help you sort through your gear, so that when you bring it in or ship it, you can be confident we'll be able to sell it for you.

If your gear doesn't qualify, don't throw it out! Someone would still love it. We recommend gifting to a friend, or donating at your nearest thrift center.

Still not sure if your gear qualifies after reviewing these guidelines? Send a couple pictures to [hello@pandorefitters.com](mailto:hello@pandorefitters.com) and we'll confirm what we can do, OR if you're local, just bring it by and we can take a look.

Accidentally ship in gear that we're unable to accept? We'll work with you on next steps – either to send it back to you (just pay shipping), or we can donate it on your behalf.

Please note – these guidelines are for individuals selling their own personal collection of used outdoor gear and apparel. If you're looking to sell larger quantities of business inventory, please reach out to [partnerships@pandorefitters.com](mailto:partnerships@pandorefitters.com) before sending anything, and we'll help you get started.

All buckles must function. Power strap, if present, must be functional.

Skis must be ready to ride. Any required ptex or epoxy, we can take care of it and deduct from consignment earnings.

## Skis - Downhill, General

Accepting in store.

Accepting online, with limitations. Please contact us before shipping.

Skis must have "indemnified" (manufacturer supported) bindings. This generally includes skis 8-10 seasons old or newer.

As a rule of thumb, we don't accept skis older than the 2015 season, unless we can find the binding model on a recent indemnification list.

We do not accept skis with “frame” touring bindings (nothing wrong with frame bindings, but they just don’t sell successfully in our shop).

Skis must not have blown edges, or signs of core damage.

Bindings must be able to pass a binding release test. We perform binding release tests when the ski is *sold*. Almost all skis pass just fine. If a ski doesn’t pass, we can’t sell it and will return it to the owner.

Skis must be ready to ride. Any required ptex or epoxy, we can take care of it and deduct from consignment earnings.

## Skis - Flat (No Bindings)

Accepting in store.

Accepting online, with limitations. Please contact us before shipping.

Used flat skis don’t sell well, except for models that appeal to advanced skiers.

In most cases we don’t accept anything older than about 5 seasons, and only skis in great condition. An exception might be made for really popular well-known models, or if you’re okay pricing really low (think \$50 or less).

No flat skis that have already been mounted 3 times.

Background - Flat skis typically require bare minimum \$150 or more additional investment to get them to a functional state. This isn’t appealing for most customers, given that we have newer skis that come with bindings available starting around \$150.

We’ll occasionally get advanced skiers who bring their own bindings and are stoked to mount them on an older bargain flat ski, but we never see this happen with beginner-oriented or groomer-oriented flat skis.

## Skis - Kids

Accepting in store.

Kids skis have the same requirements as adult skis, except that kids bindings are generally indemnified for a little longer. On average we can accept skis about 12 seasons old or newer.

Touring skis have the same requirements as downhill skis, except for binding indemnification. If a binding is not a DIN set binding, it does not require indemnification, but it DOES need to not have any active recalls.

NOT accepting heavily-insulated snowmobiling pants and bibs.
